## *TriPLICATE PRESCRIPTION PROGRAM ATLAS*

### **2001-2010**

# Contents

In 1986, the Triplicate Prescription Program (TPP) was established to monitor the use of certain drugs prone to misuse and abuse. The mandate of the TPP is:

- To improve patient care by providing timely and relevant information on targeted drugs to prescribers, pharmacists, and consumers.
- To reduce the misuse and abuse (non-medical use) of targeted medications.
- To monitor the prescribing and dispensing practices of physicians and pharmacists for the targeted medications.
- To provide timely, accurate information and feedback to prescribers and pharmacists regarding prescribing and dispensing practices and patterns for the targeted drugs.
- To identify potential areas of drug misuse or abuse and work with TPP partners to address issues.

# TriPLICATE Prescription Program Practitioners, Pharmacies, Patients, and Prescriptions

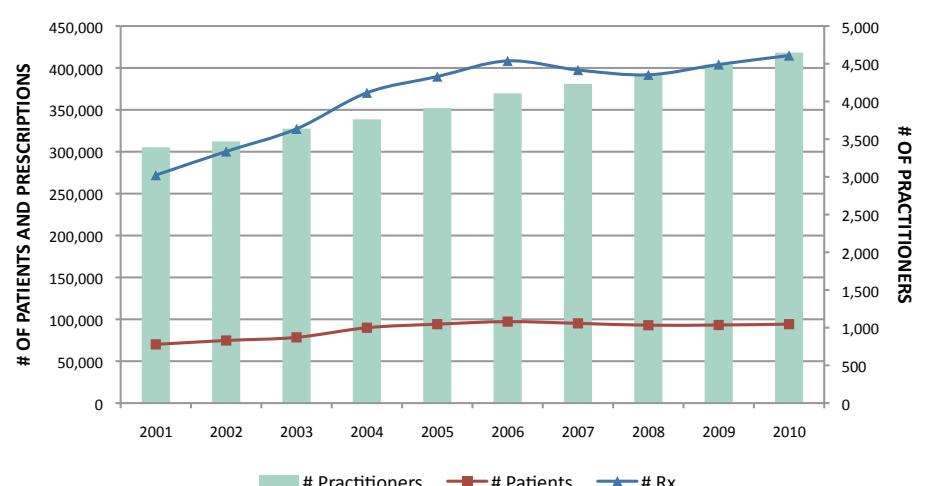

## Patients, Practitioners, and Prescriptions

The number of TPP practitioners, patients, and prescriptions by type of practitioner, is shown in Table 1. Of note, participation in the TPP only became mandatory for veterinary practitioners in 2010, hence the large increase in numbers for that practitioner group in 2010. The ten-year trend in utilization patterns are also shown for Alberta physicians, Alberta dentists, and Yukon physicians in Figures 1, 2, and 3, respectively.

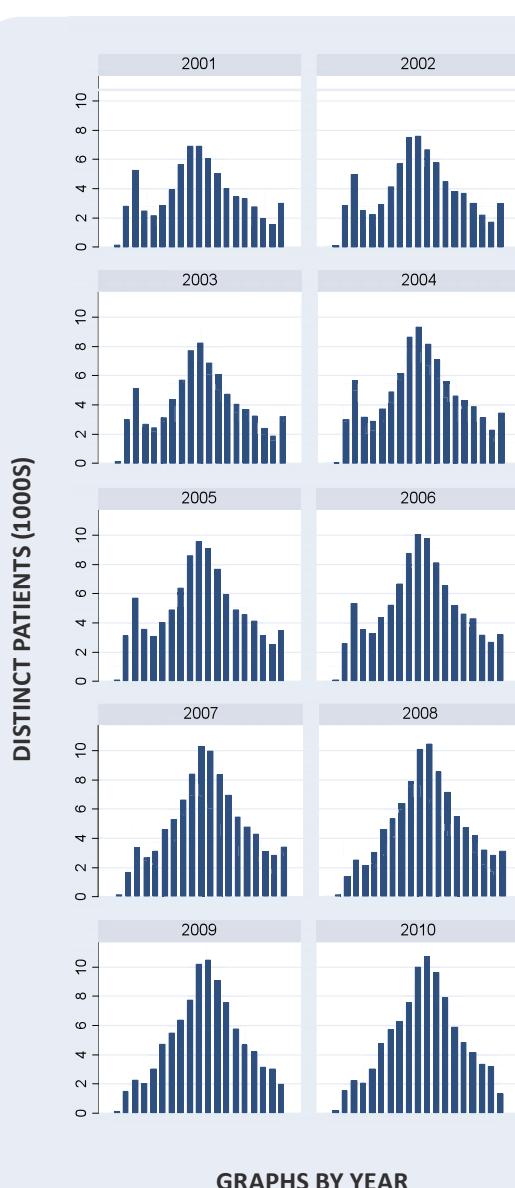

**Table 1. TPP prescribers, patients, and prescriptions, by practitioner type, 2001-2010.**

Alberta Physicians				Alberta Dentists				Yukon Physicians			Alberta Veterinarians		
Year	# Practitioners	# Patients	# Rx	# Practitioners	# Patients	# Rx	# Practitioners	# Patients	# Rx	# Practitioners	# Patients	# Rx	
2001	3,392	70,095	272,039	374	3,836	4,575	74	715	3,118	29	48	104	
2002	3,470	74,728	300,331	402	3,827	4,605	83	840	3,256	38	82	141	
2003	3,639	78,435	327,292	396	3,932	4,726	80	781	3,329	36	70	112

# Triplet Prescription Program Medication Utilization

## Guide to Atlas Charts

The following sections give summary information on specific TPP medication categories. This section provides a guide to the six standard charts used to present this information.

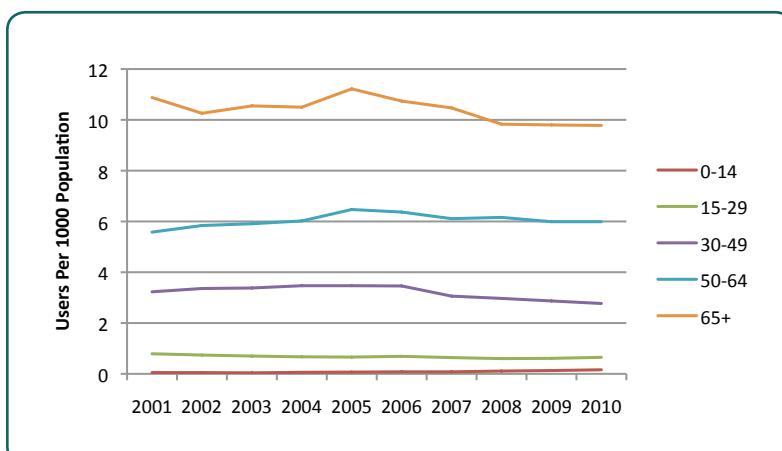

### 1. Age-standardized utilization, by sex, 2001-2010.

Age-standardized utilization (users per 1000 population with 95% confidence intervals) is shown, by sex, from 2001-2010. The 1991 Canadian census population was used as the standard population.

### 2. Age-specific utilization, 2001-2010.

Utilization (users per 1000 population) is shown from 2001-2010, for five different age groups (0-14, 15-29, 30-49, 50-64, 65+).

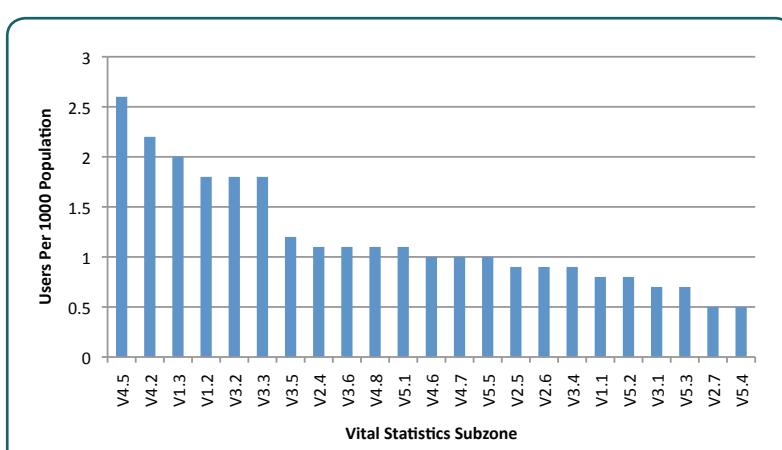

### 3. Distribution of utilization by year, 2001-2010.

The distribution of utilization (users per 1000 population) across all vital statistics subzones is shown using box plots. Each box plot shows one year between 2001 and 2010. The box represents 50% of the data points, with the line in the middle indicating the median (i.e., mid-point). The lines above and below the box show the ranges for the upper and lower 25% of the data points. Outliers that exceed 1.5 times the range of the upper or lower portion of the box, are shown as points.

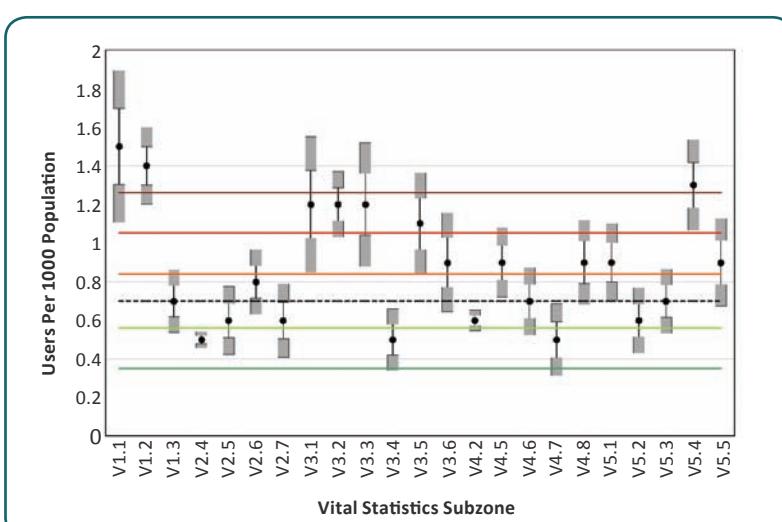

### 4. Ranked vital statistics subzone utilization, 2010.

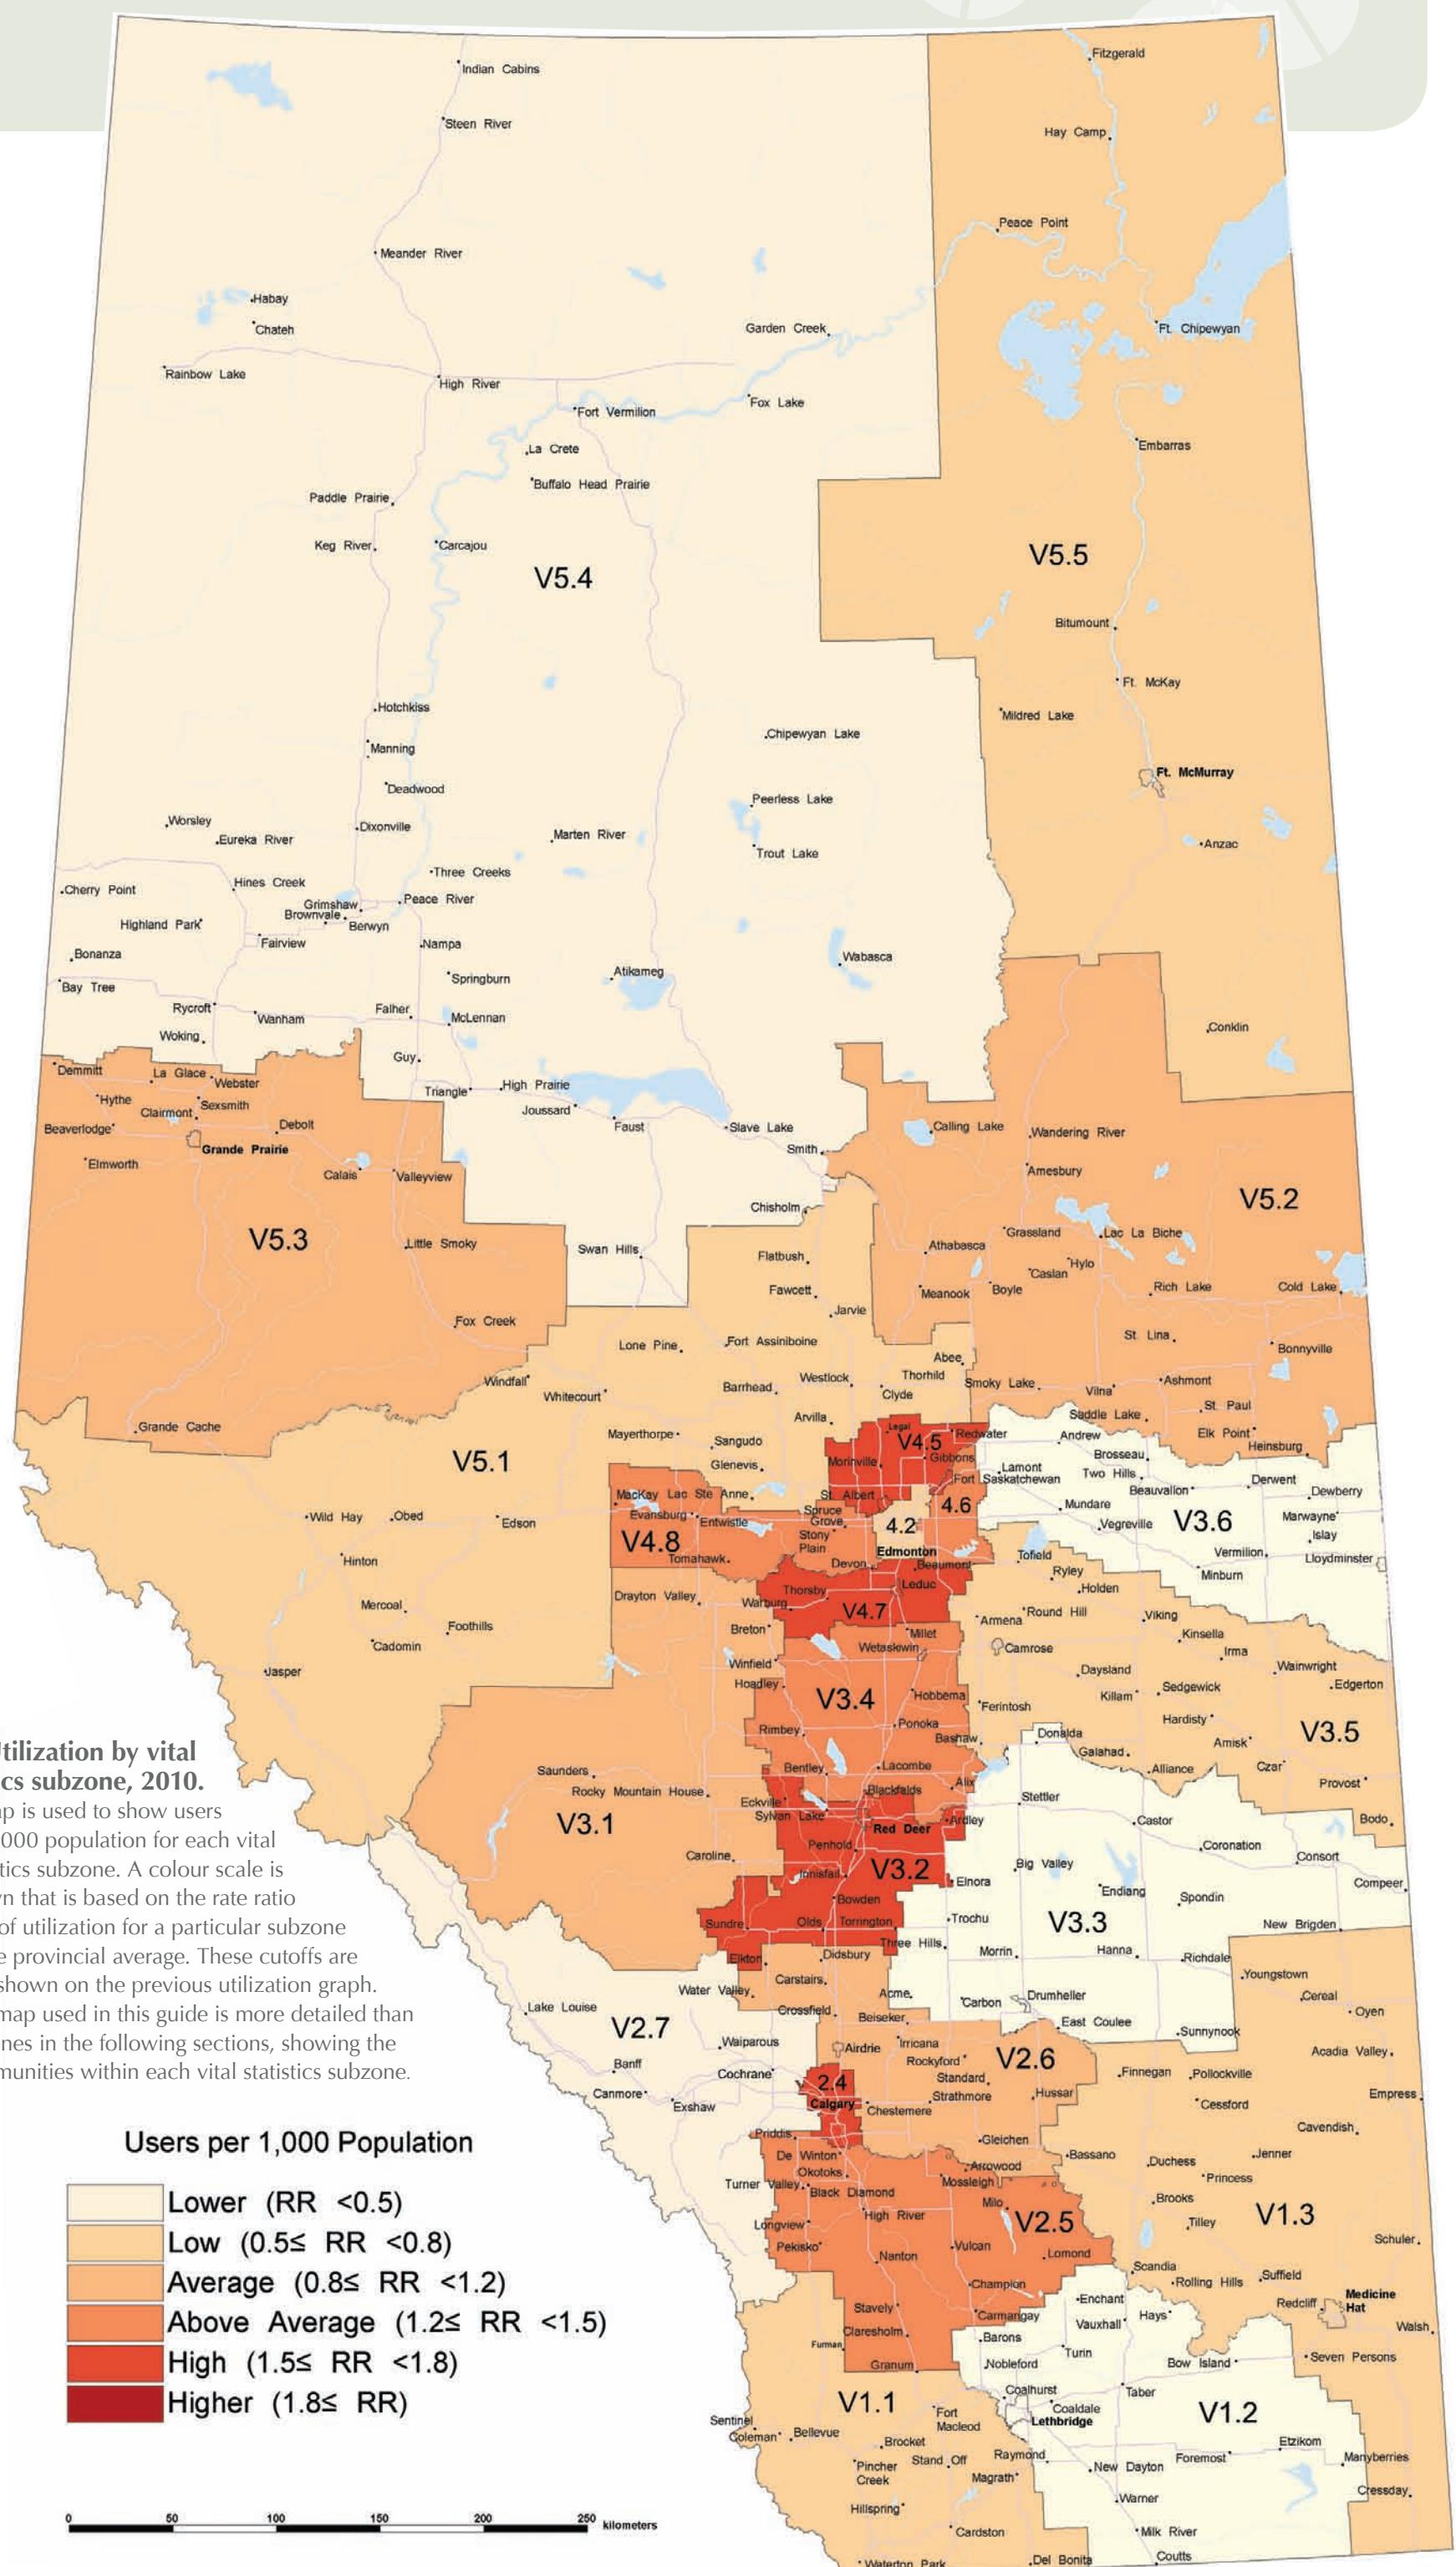

For the year 2010, the utilization (users per 1000 population) for each vital statistics subzone is ranked from highest to lowest. The ranked columns give another perspective on the shape of the distribution of utilization across all vital statistics subzones.

### 5. Utilization estimates by vital statistics subzone, 2010.

For the year 2010, the utilization (users per 1000 population with 95% confidence intervals) is shown for each vital statistics subzone. A hashed black line shows the provincial average. Coloured lines correspond to colour cutoffs on the following map. The cutoffs are based on the rate ratio of utilization for a particular vital statistics subzone to the provincial average.

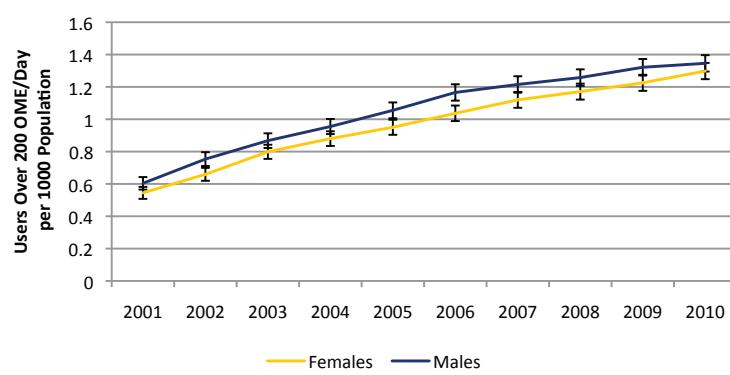

# Tripletate Prescription Program Medication Utilization

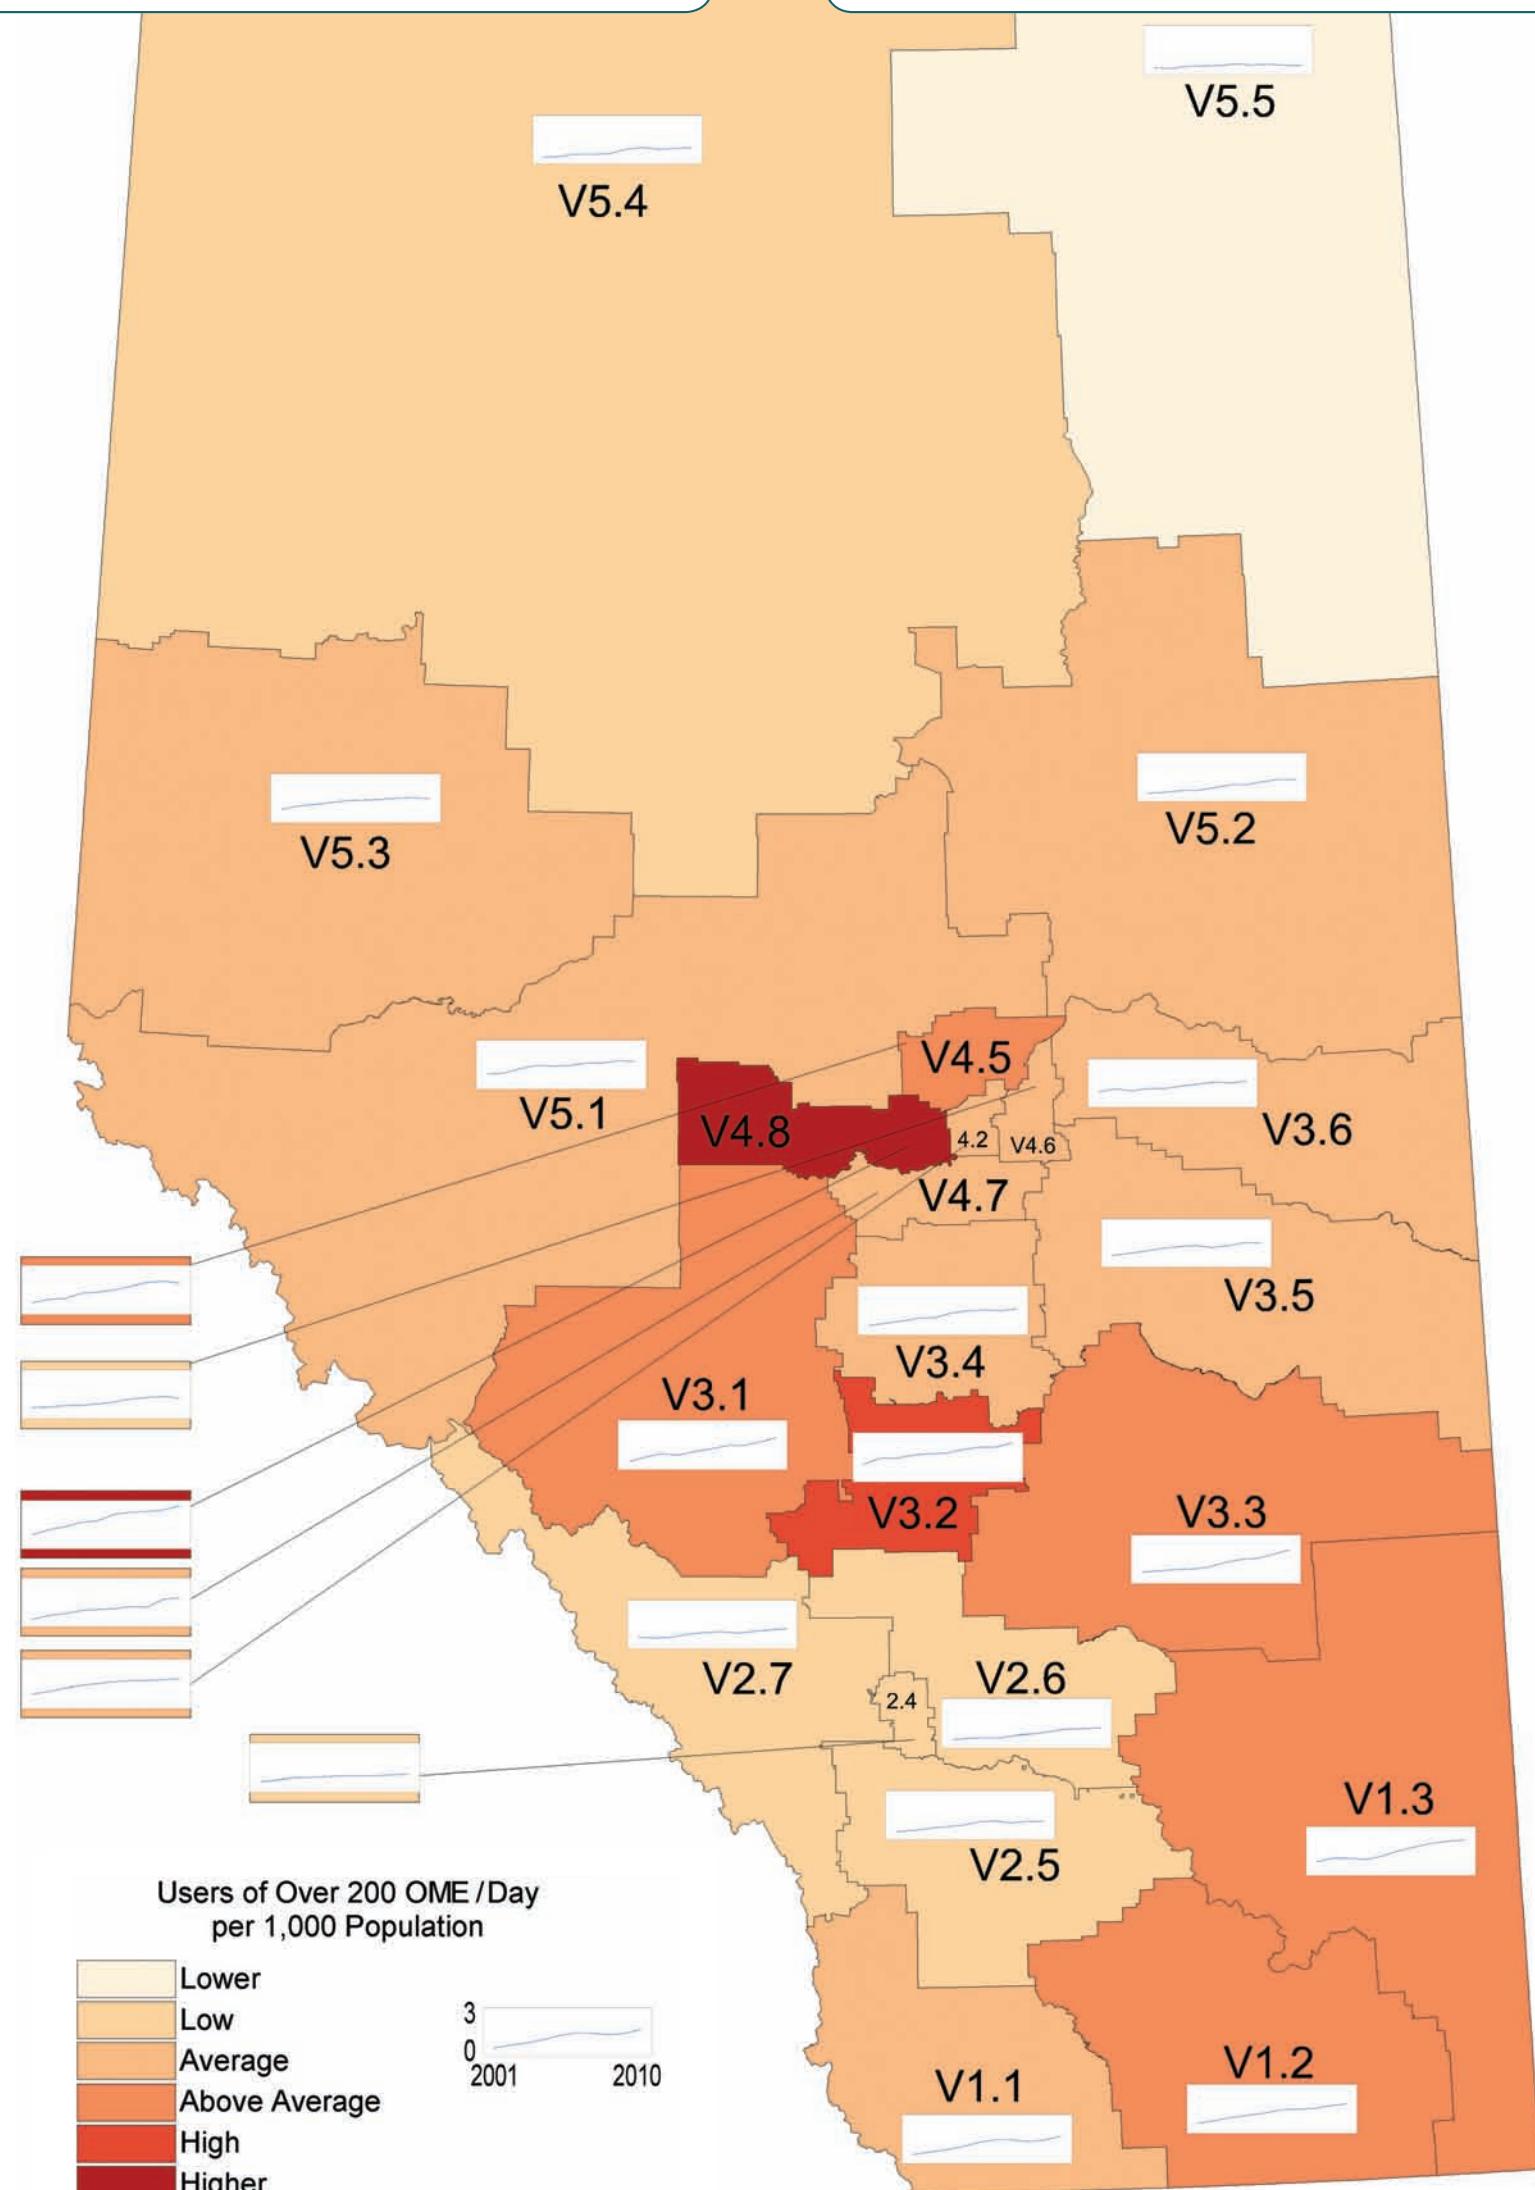

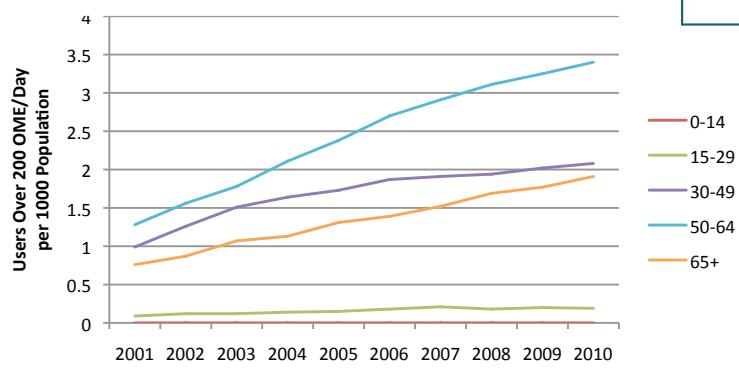

## High-Dose Utilization of Opioids

Users of over 200 oral morphine equivalents per day (OME/day) per 1000 population.

Age-standardized utilization of high-dose opioids, by sex, 2001-2010.

Age-specific utilization of high-dose opioids, 2001-2010.

# TriPLICATE PRESCRIPTION PROGRAM MEDICATION UTILIZATION

## Medication Categories

Tables 2–4 show a breakdown of all TPP prescriptions for 2010, by Anatomical Therapeutic Classification (ATC) major categories and sub-categories.

**Table 2. Number of TPP prescriptions by major Anatomical Therapeutic Classification category, 2010.**

Major Anatomical Therapeutic Classification	Number of Prescriptions	Percent
N-Nervous System	411,192	99.1%
R-Respiratory System	2,362	0.6%
G-Genito-Urinary System & Sex Hormones	860	0.2%
A-Alimentary Tract & Metabolism	364	0.1%
M-Musculo-Skeletal System	44	0.0%
V-Various	1	0.0%
No ATC Code	1	0.0%
Total	414,824	100%

**Table 3. Breakdown of nervous system prescriptions, 2010.**

Nervous System Medication Category	Number of Prescriptions	Percent
N02-Analgesics (Page 10)	358,668	87.2%
N07-Drugs for Addictive Disorders (Page 12)	30,754	7.5%
N06-Psychoanaleptics (Page 14)	21,072	5.1%
N01-Anesthetics	667	0.2%
N03-Antiepileptics	17	0.0%
N05-Psycholeptics	14	0.0%
Total	411,192	100%

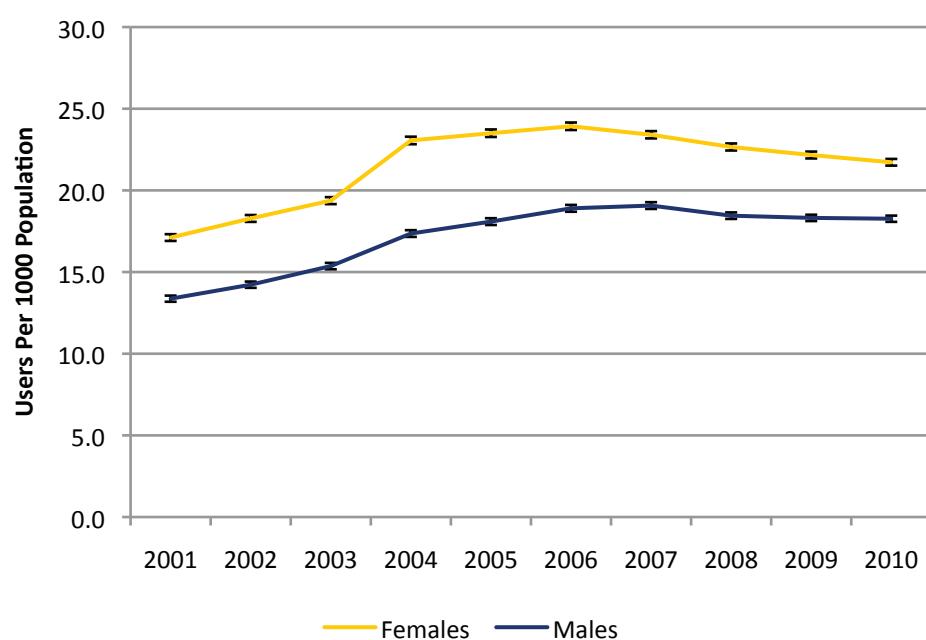

**Table 4. Breakdown of analgesic prescriptions, 2010.**

Nervous System Medication Category	Number of Prescriptions	Percent
N02BE51-Acetaminophen, comb excl. Psycholeptics (Page 16)	136,311	38.0%
N02AA05-Oxycodone (Page 18)	96,680	27.0%
N02AA01-Morphine (Page 20)	50,175	14.0%
N02AA03-Hydromorphone (Page 22)	45,202	12.6%
N02AB03-Fentanyl (Page 24)	12,089	3.4%
N02AB02-Pethidine (Page 26)	8,465	2.4%
N02AA79-Codein, combinations with Psycholeptics	3,810	1.1%
N02AC04-Dextropropoxyphene	2,756	0.8%
N02AF01-Butorphanol	876	0.2%
N02BA71-Acetylsalicylic Acid, comb with Psycholeptics	820	0.2%
N02BA51-Acetylsalicylic Acid, comb excl. Psycholeptics	717	0.2%
N02AD01-Pentazocine	441	0.1%
N02AA59-Codeine, combinations	197	0.1%
N02AA02-Opium	46	0.0%
N02AX02-Tramadol	46	0.0%
N02AX52-Tramadol, combinations	35	0.0%
N02AF02-Nalbufine	1	0.0%
N02CA52-Ergotamine, combinations excl. Psycholeptics	1	0.0%
Total	358,668	100%

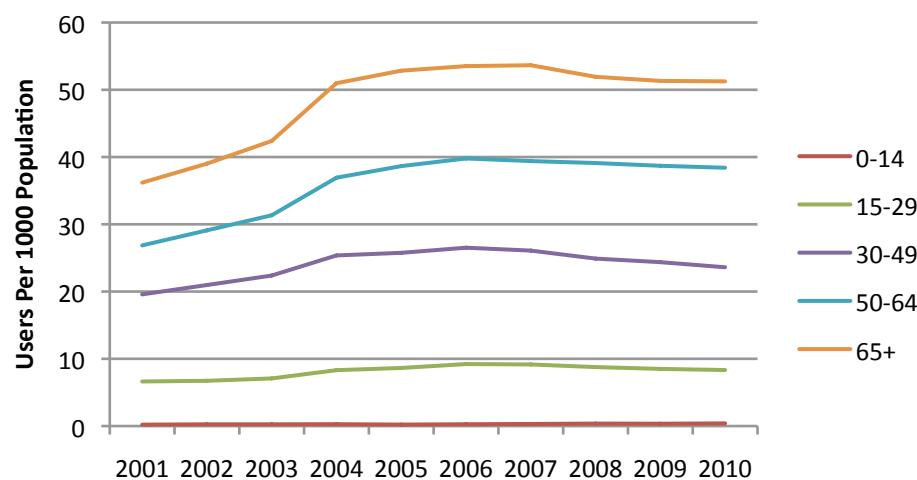

# Tripletate Prescription Program Medication Utilization

## Opioid Analgesics (N02)

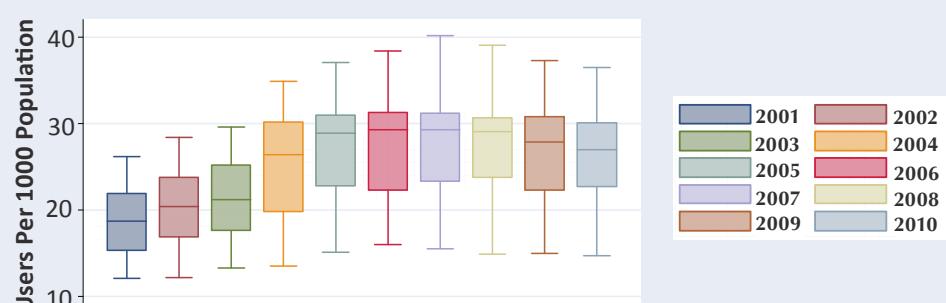

Age-standardized utilization of opioid analgesics, by sex, 2001-2010.

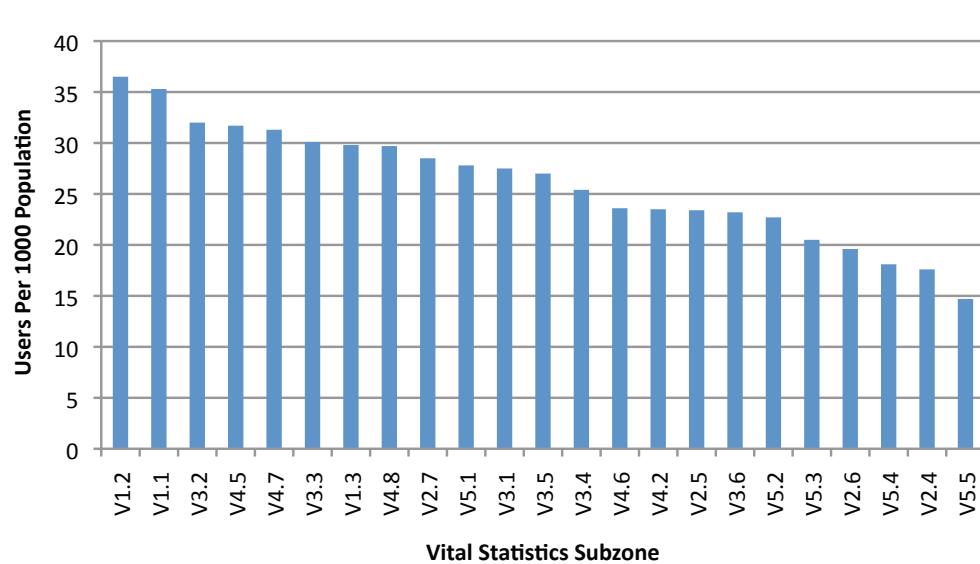

Age-specific utilization of opioid analgesics, 2001-2010.

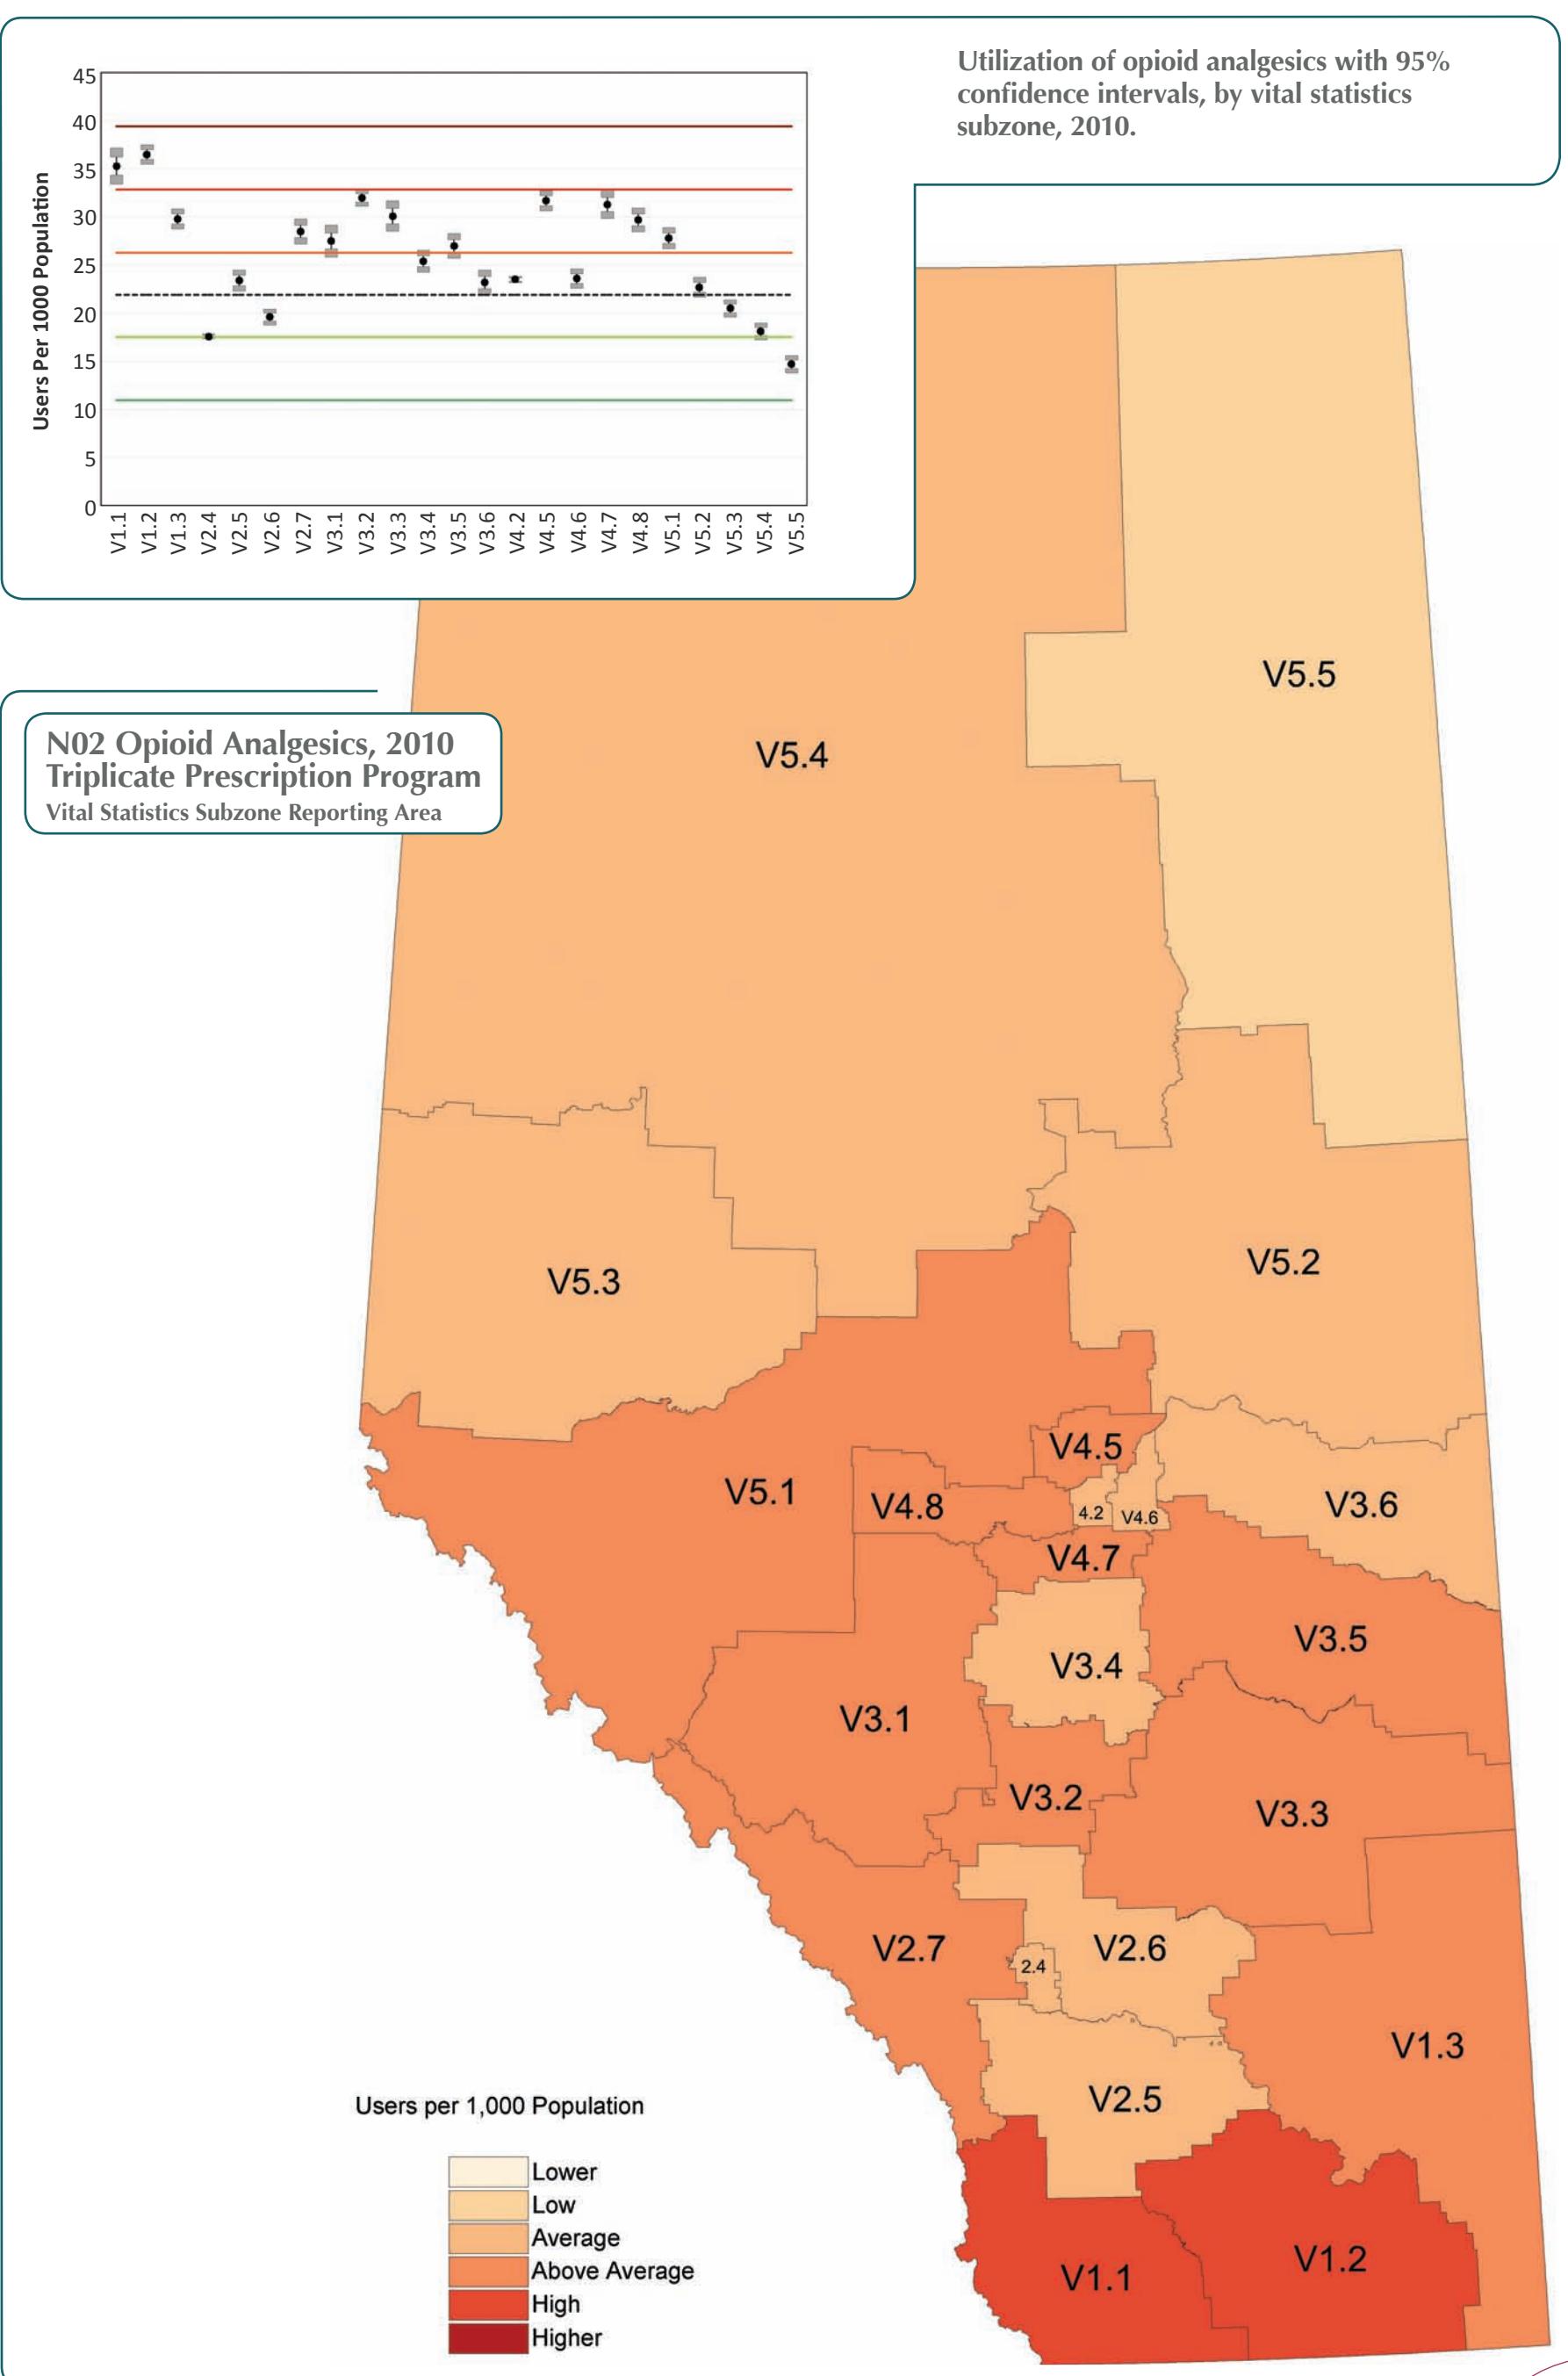

Distribution of vital statistics subzone utilization of opioid analgesics, 2001-2010.

Ranked vital statistics subzone utilization of opioid analgesics, 2010.

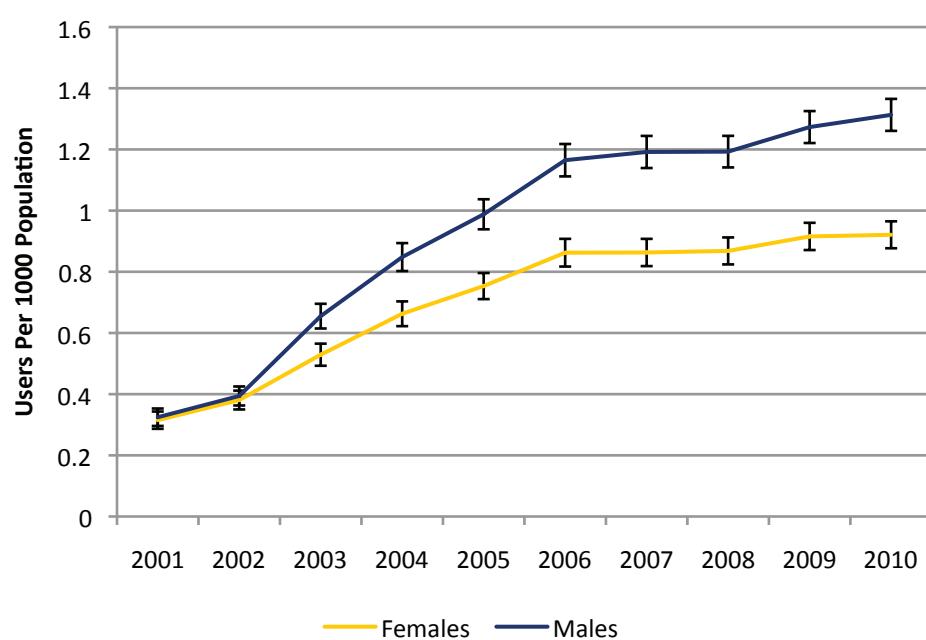

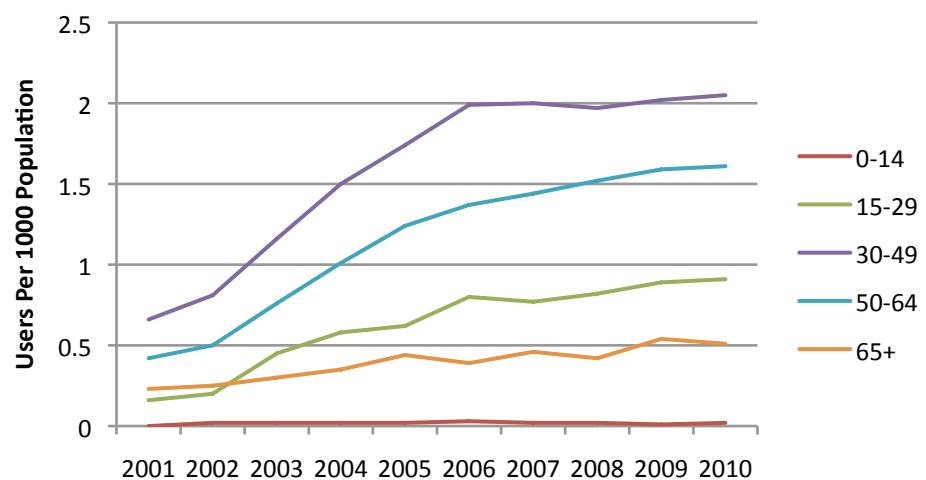

# Tripletate Prescription Program Medication Utilization

## Drugs for Addictive Disorders (N07)

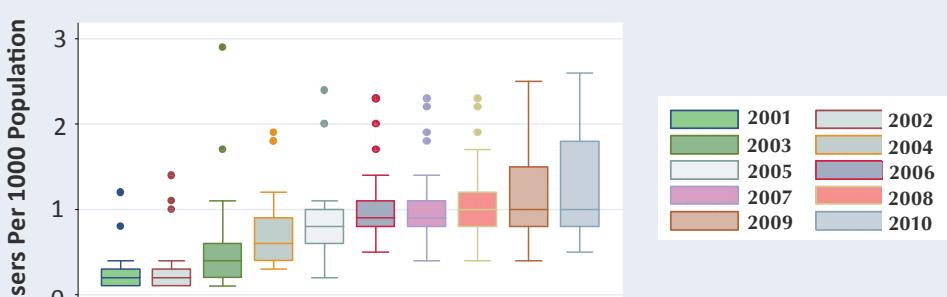

Age-standardized utilization of drugs for addictive disorders, by sex, 2001-2010.

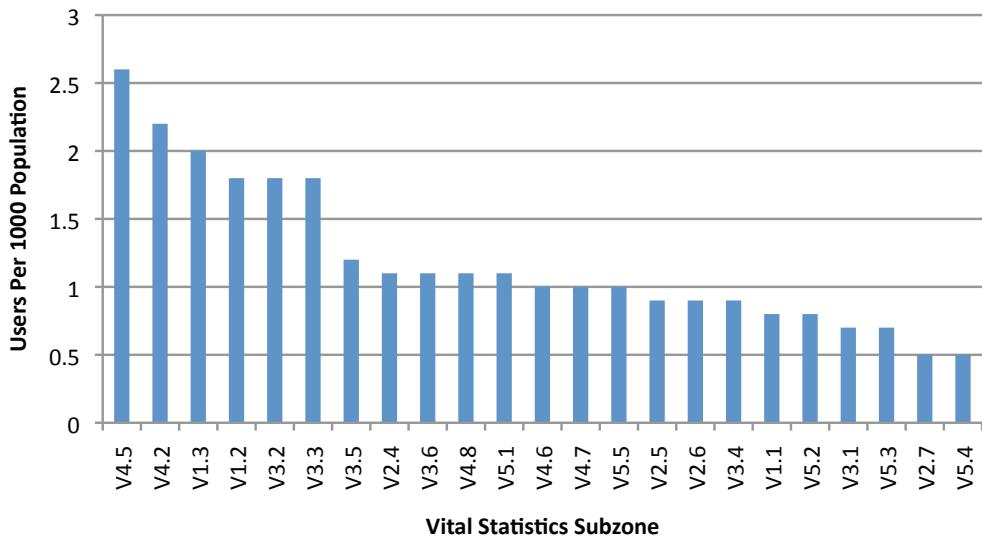

Age-specific utilization of drugs for addictive disorders, 2001-2010.

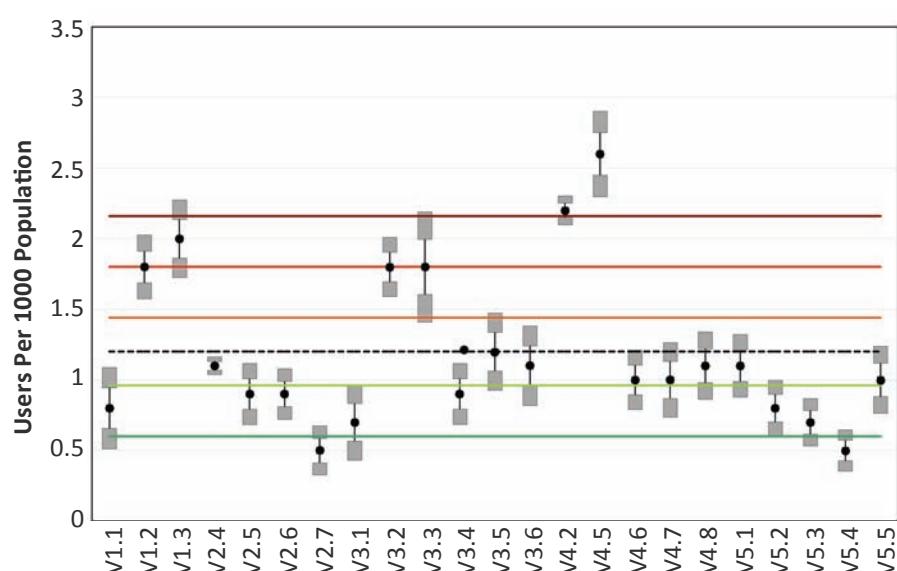

Distribution of vital statistics subzone utilization of drugs for addictive disorders, 2001-2010.

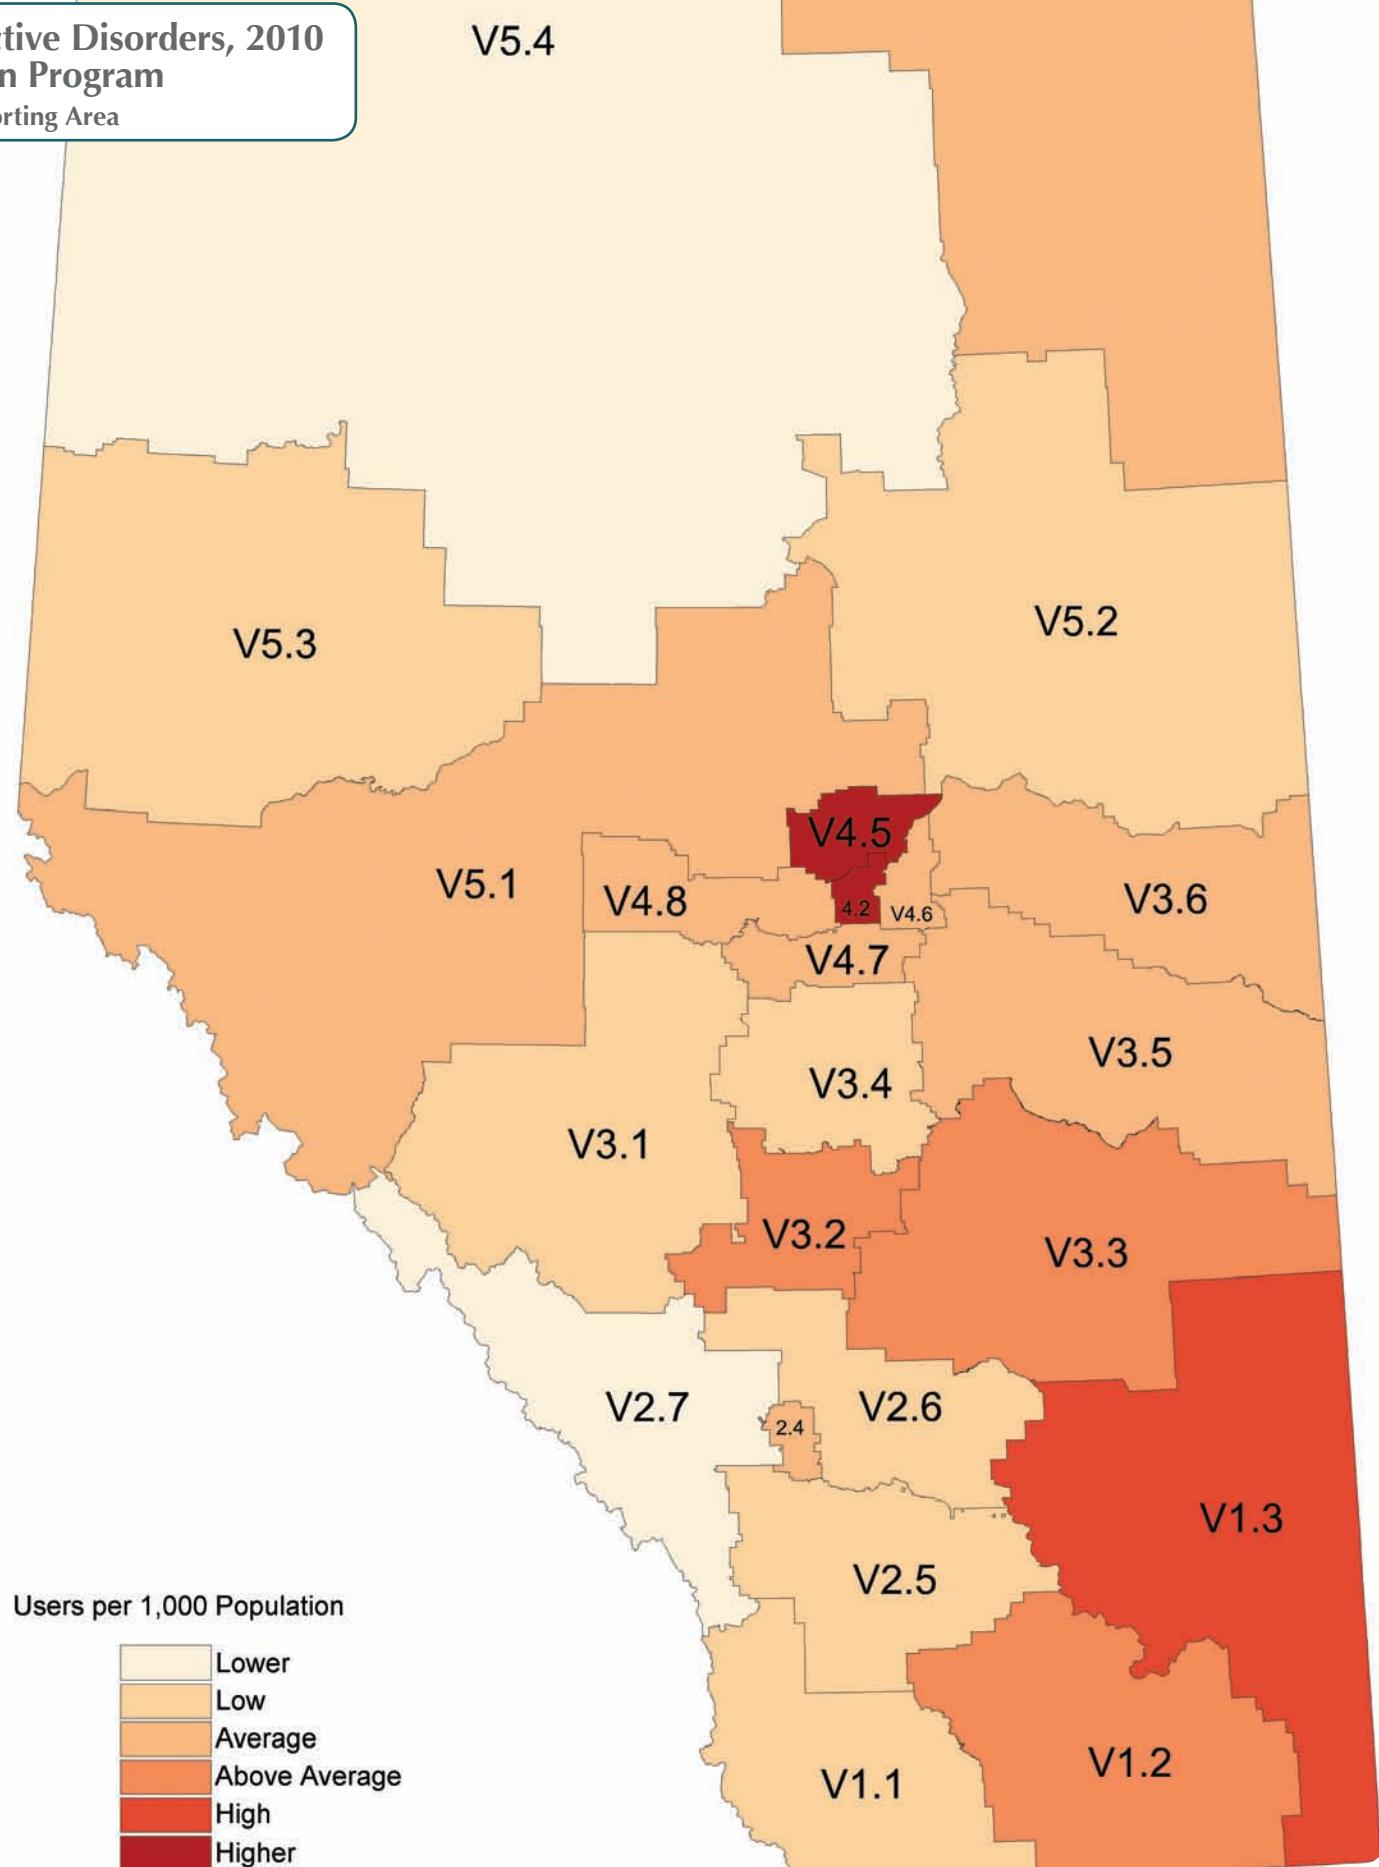

Ranked vital statistics subzone utilization of drugs for addictive disorders, 2010.

Utilization of drugs for addictive disorders with 95% confidence intervals, by vital statistics subzone, 2010.

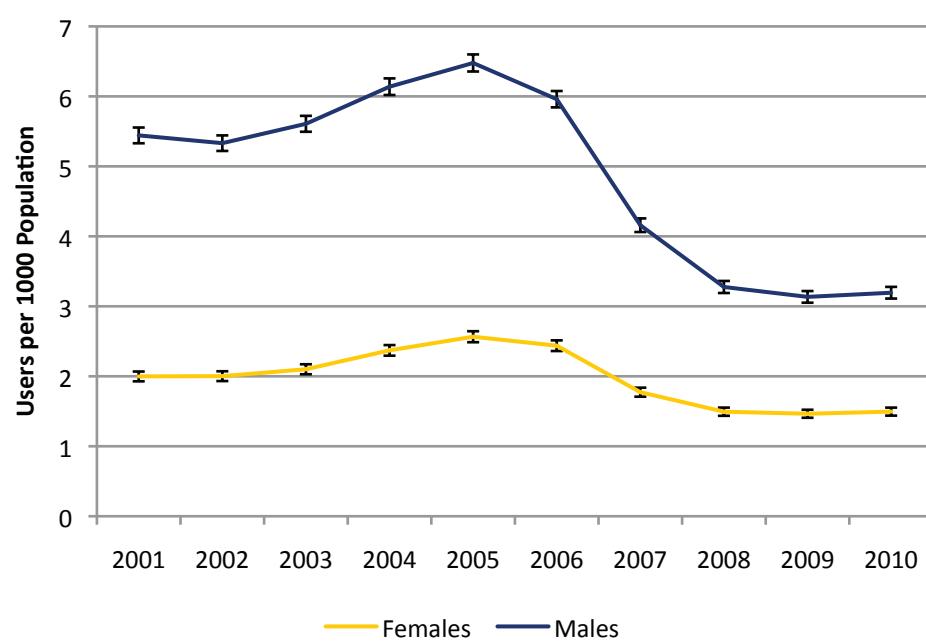

N07 Drugs for Addictive Disorders, 2010  
Triplicate Prescription Program

## TriPLICATE Prescription Program Medication Utilization

### Psychoanaleptics (N06)

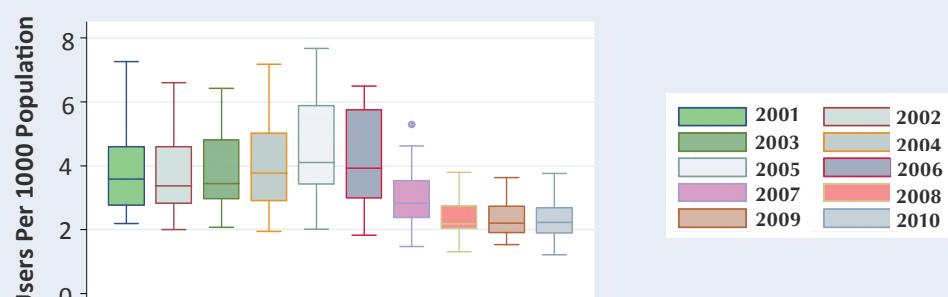

Age-standardized utilization of psychoanaleptics, by sex, 2001-2010.

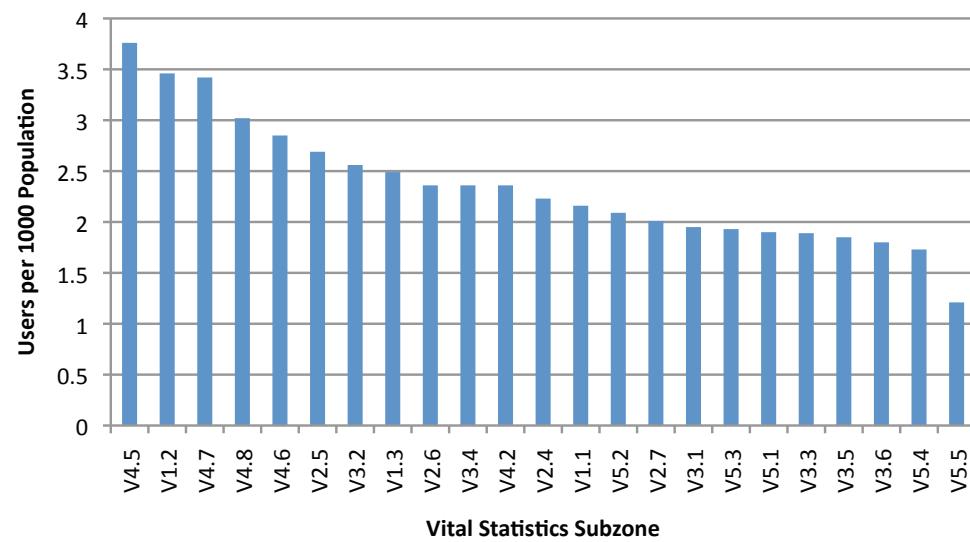

Age-specific utilization of psychoanaleptics, 2001-2010.

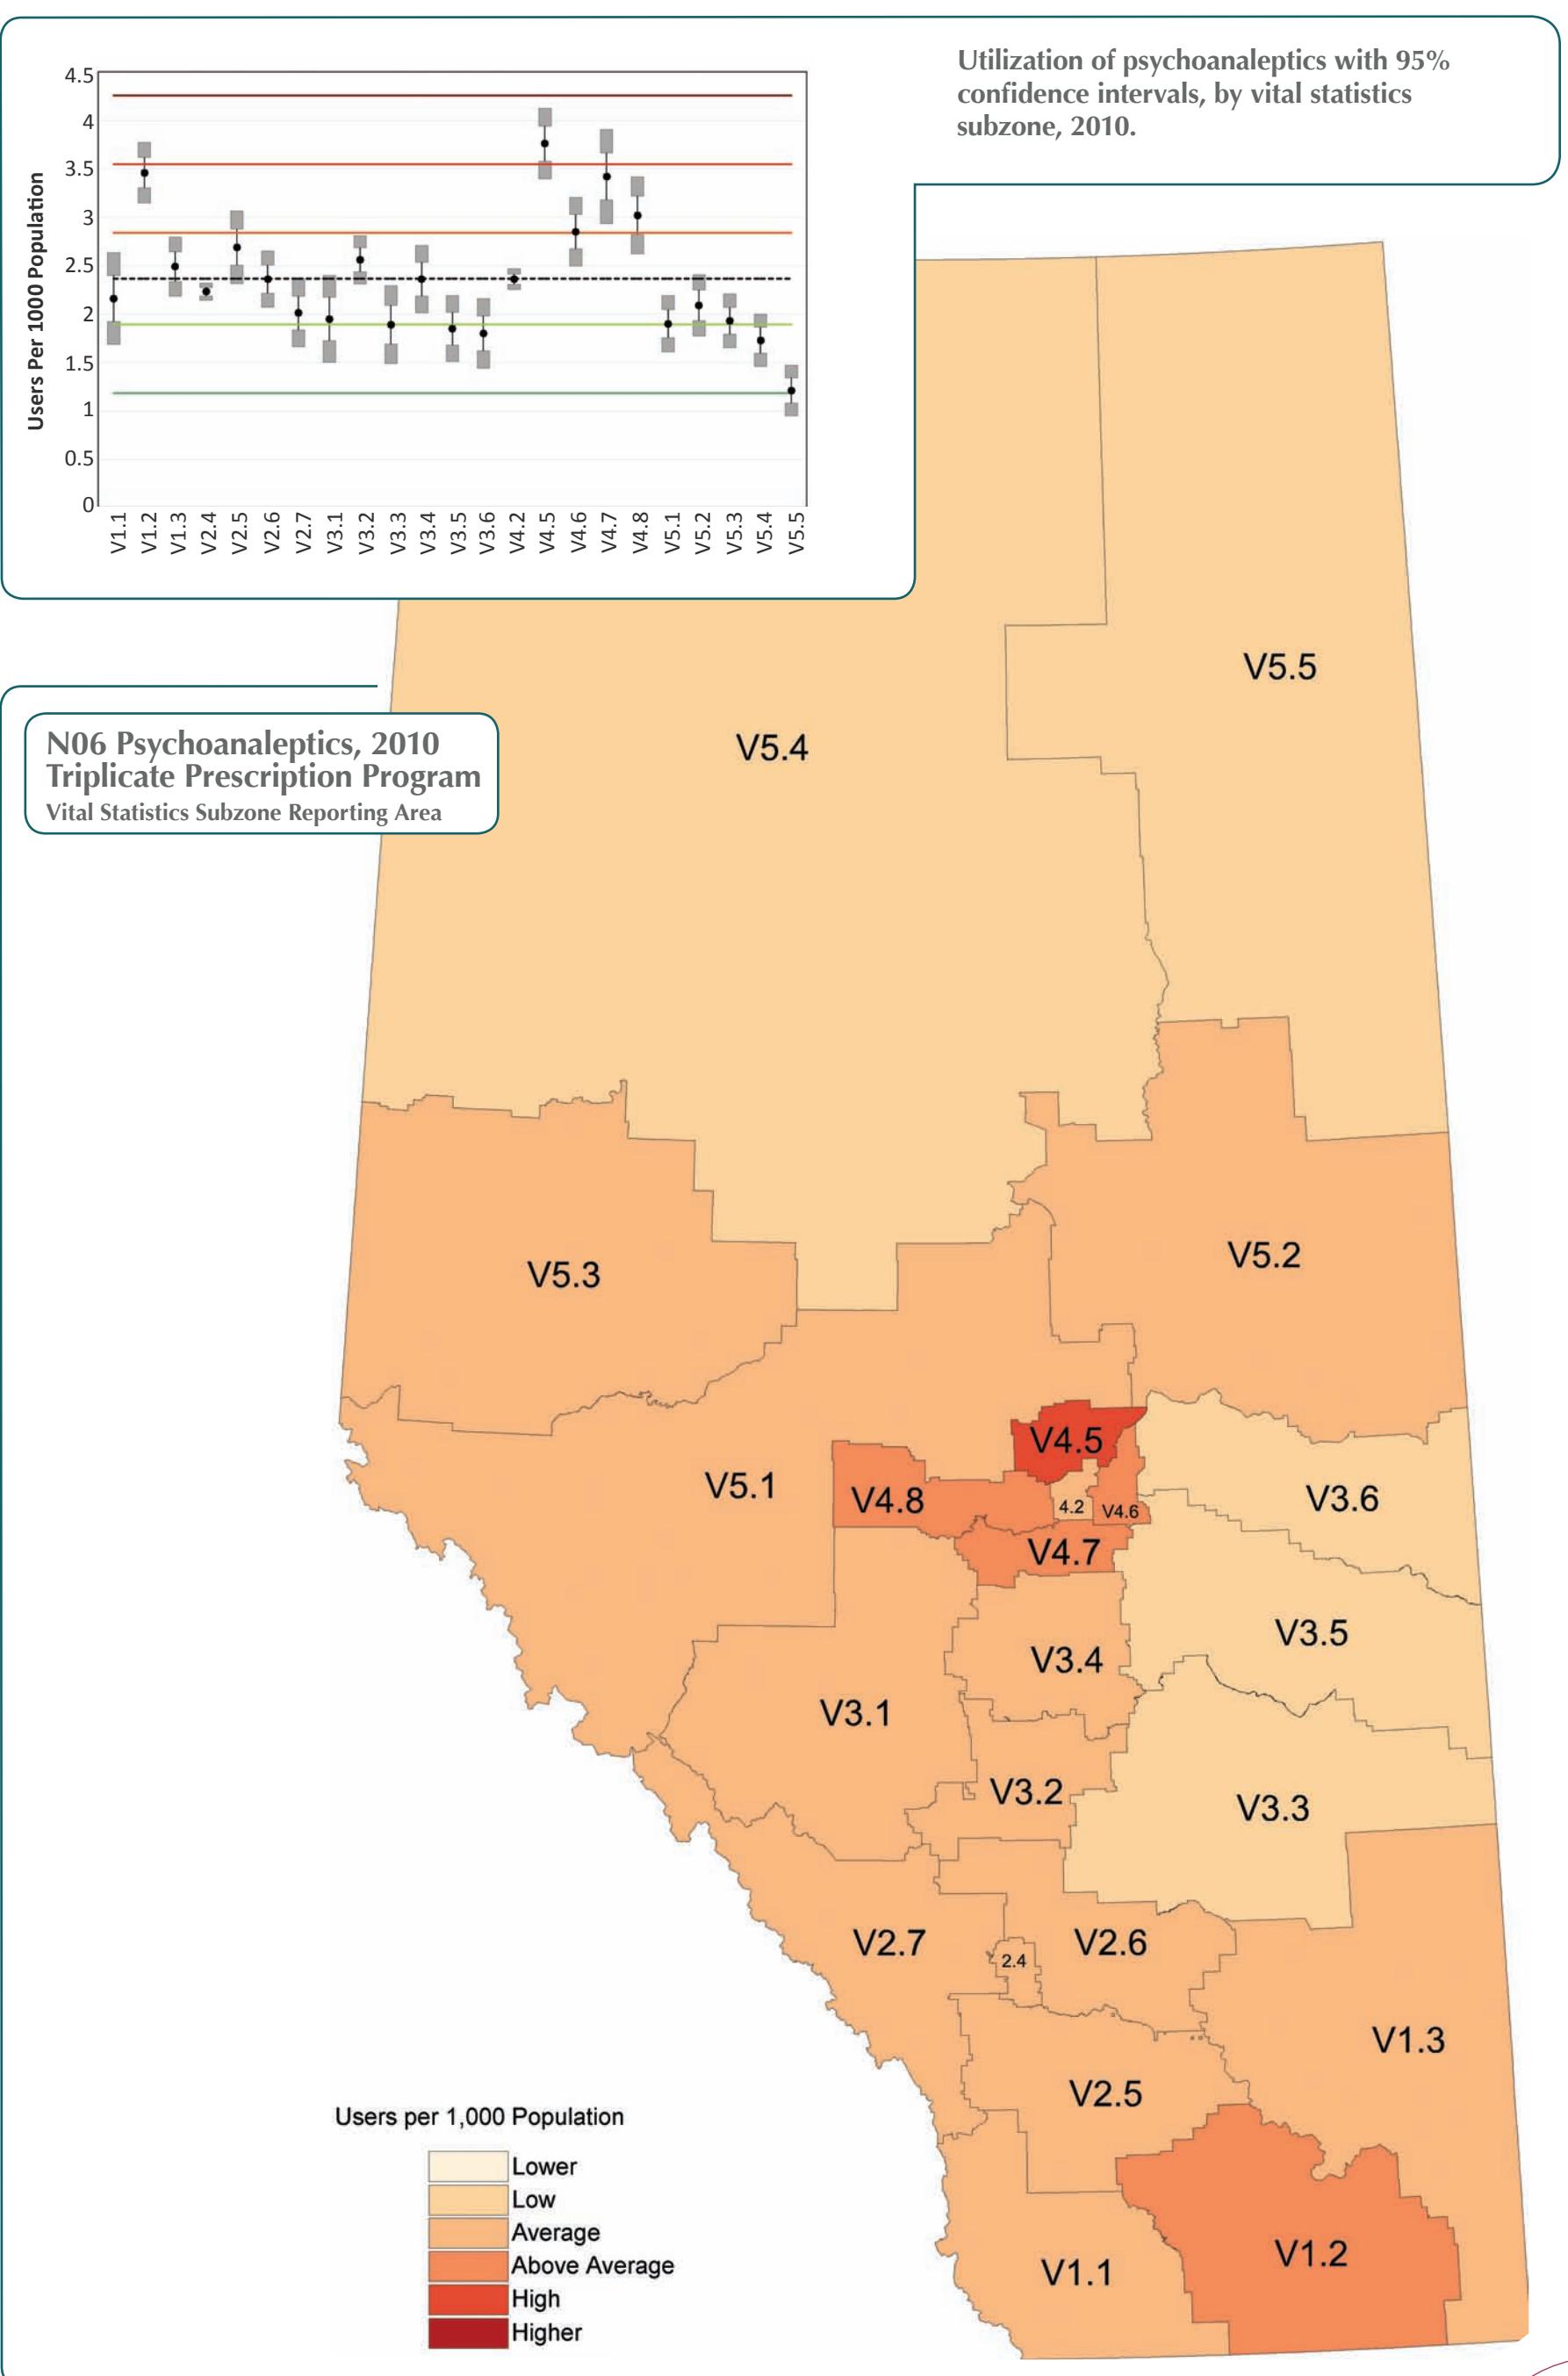

Distribution of vital statistics subzone utilization of psychoanaleptics, 2001-2010.

Ranked vital statistics subzone utilization of psychoanaleptics, 2010.

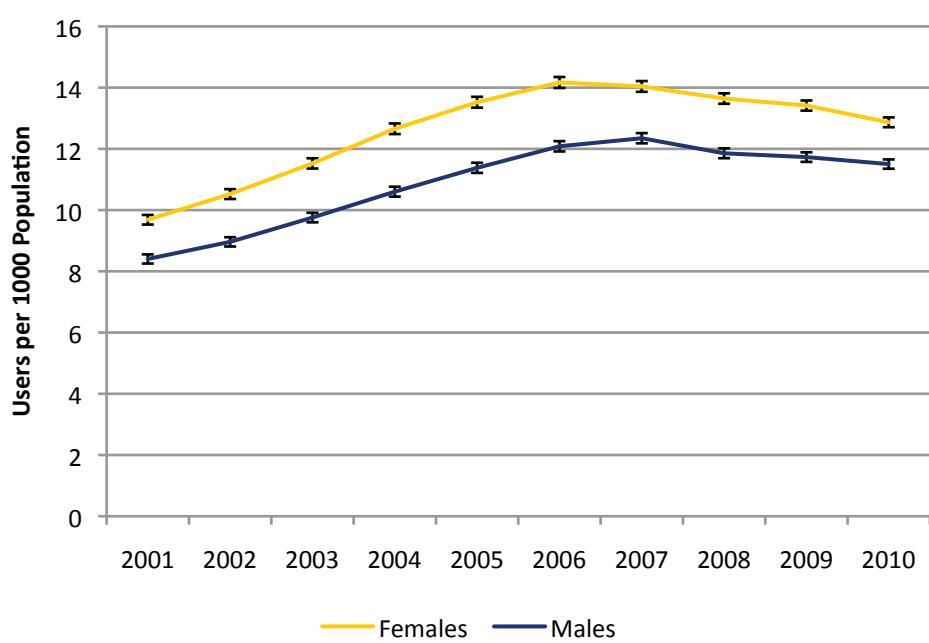

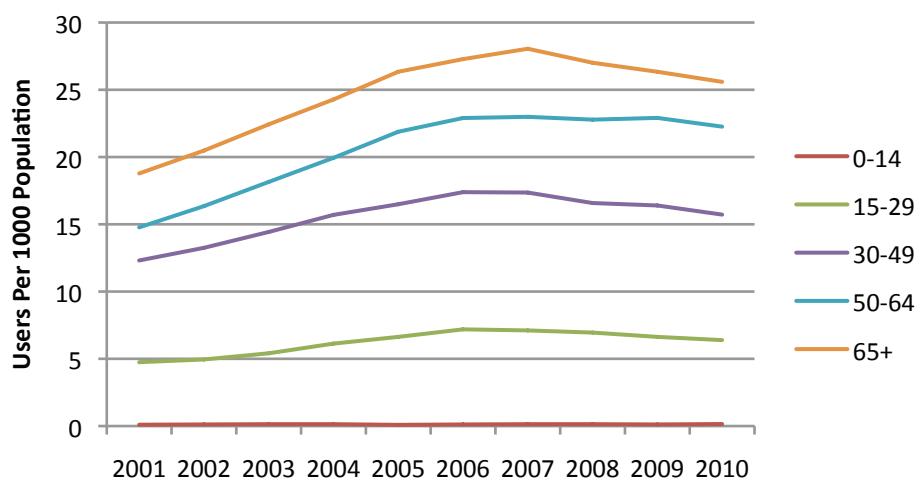

## Comparison of Top Six Opioid Analgesics

### Oxycodone-Acetaminophen Combinations (N02BE51)

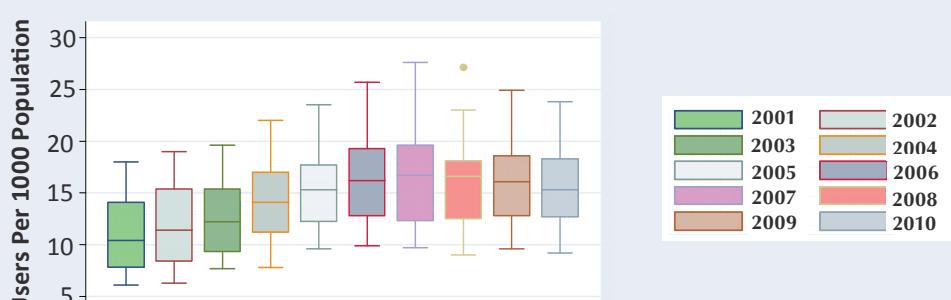

Age-standardized utilization of oxycodone-acetaminophen combinations, by sex, 2001-2010.

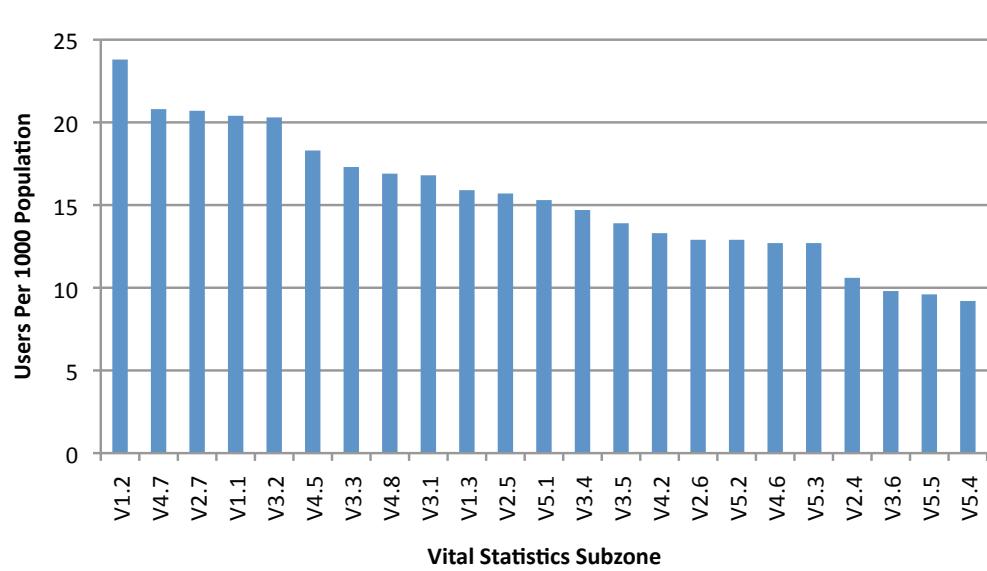

Age-specific utilization of oxycodone-acetaminophen combinations, 2001-2010.

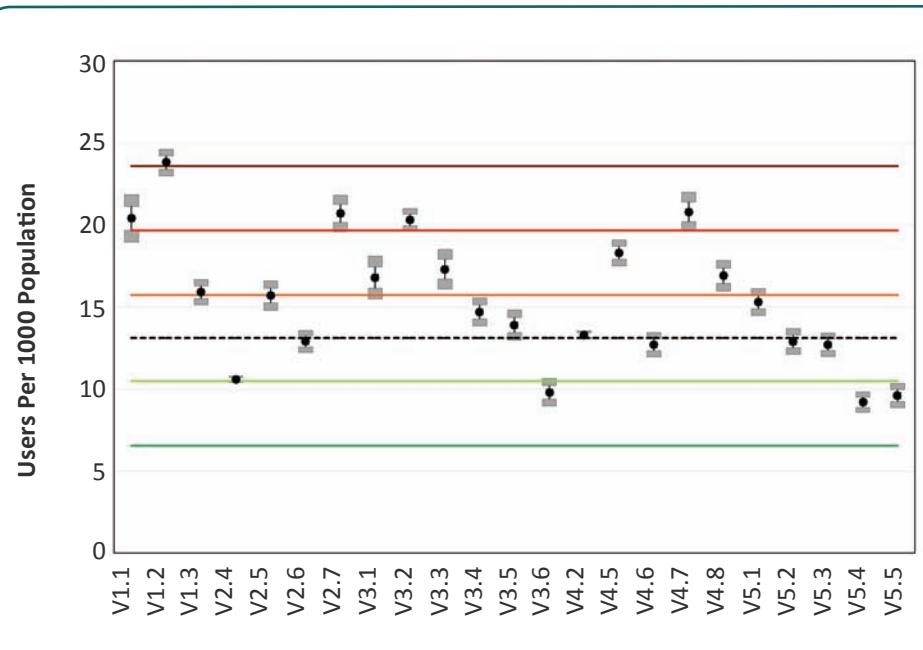

Distribution of vital statistics subzone utilization of oxycodone-acetaminophen combinations, 2001-2010.

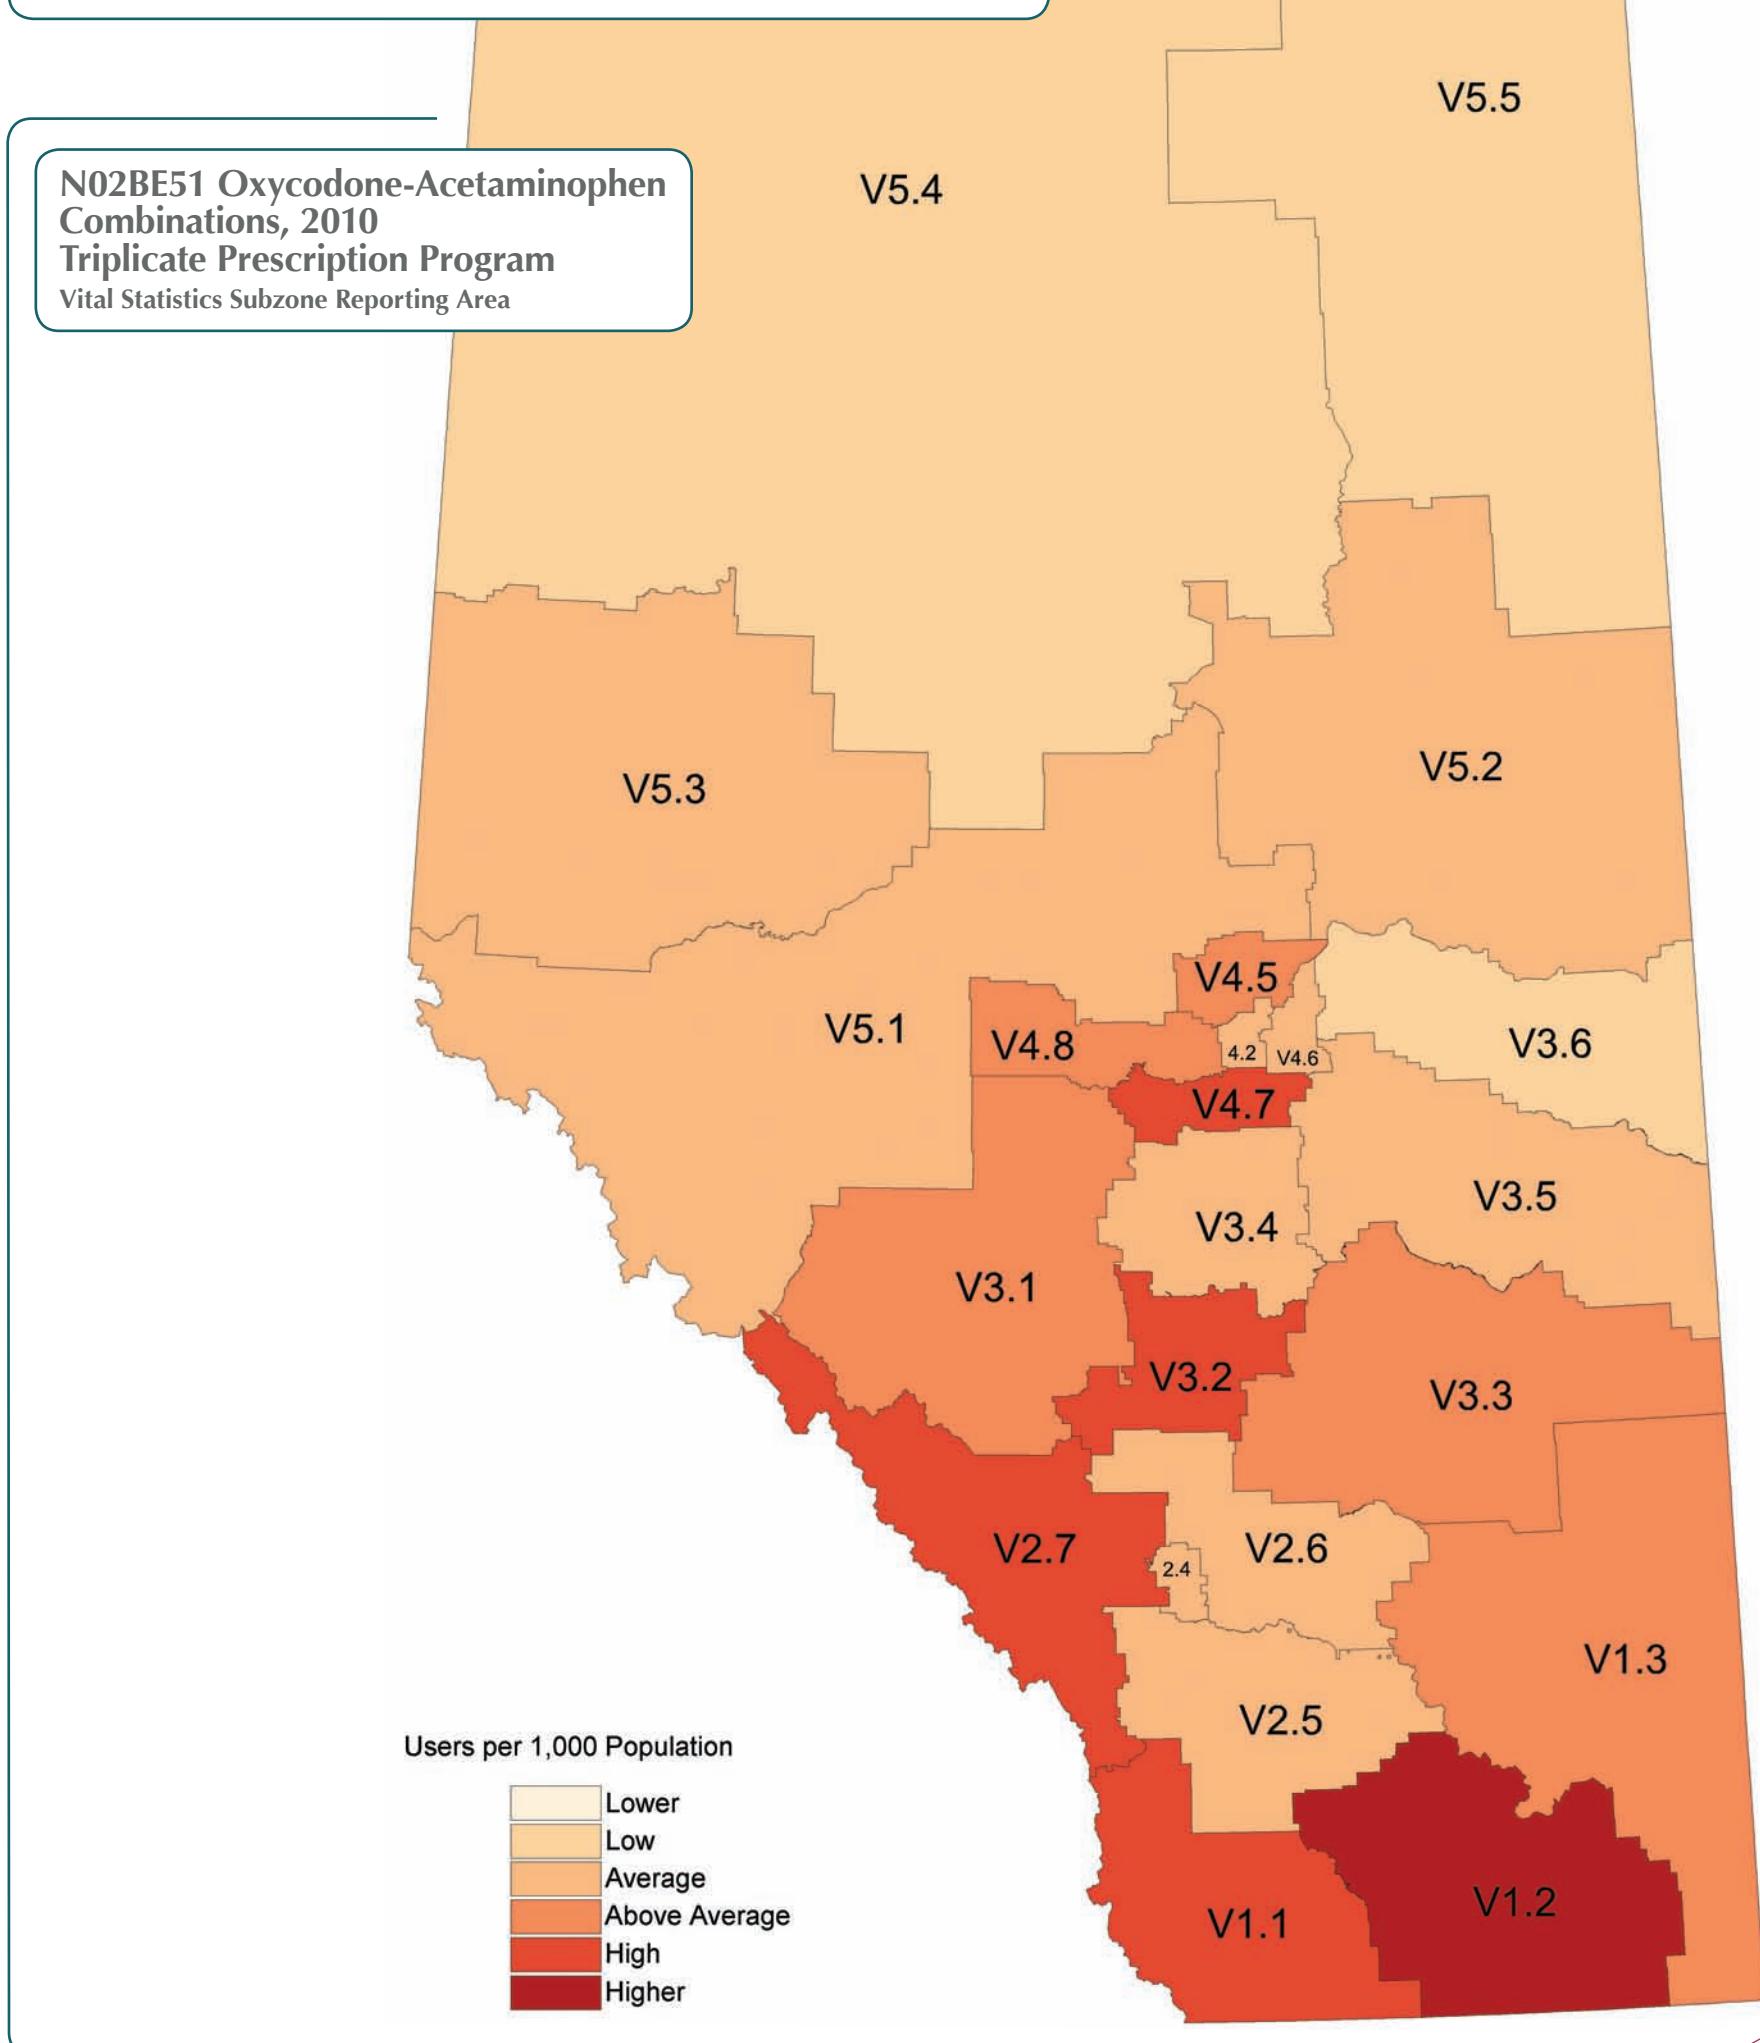

Ranked vital statistics subzone utilization of oxycodone-acetaminophen combinations, 2010.

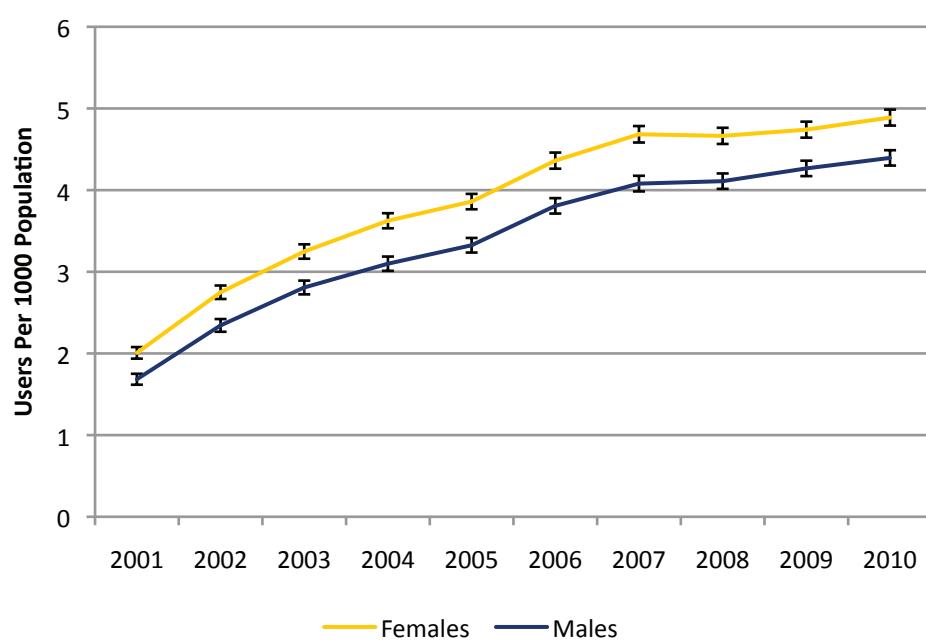

## **Utilization of oxycodone-acetaminophen combinations with 95% confidence intervals, by vital statistics subzone, 2010.**

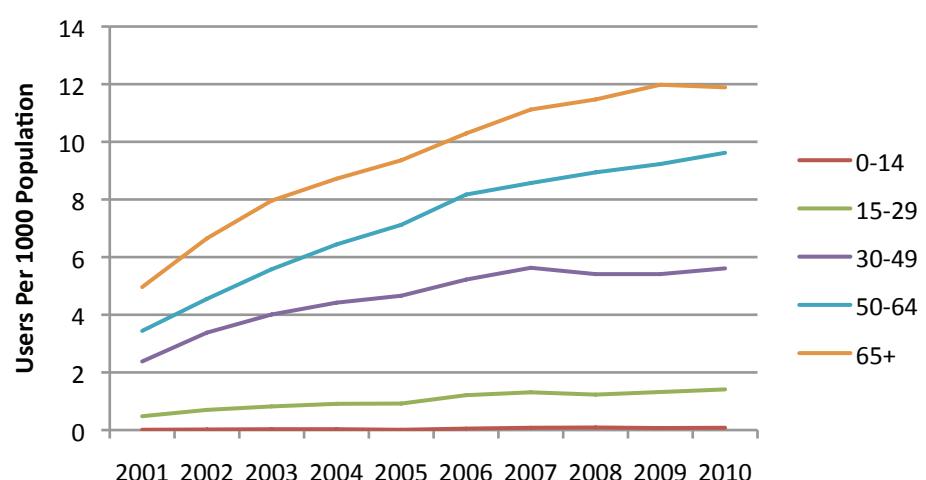

## Comparison of Top Six Opioid Analgesics

### Oxycodone (N02AA05)

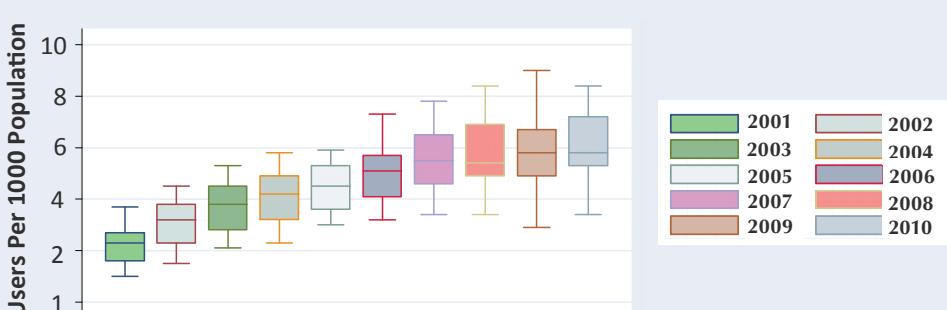

Age-standardized utilization of oxycodone, by sex, 2001-2010.

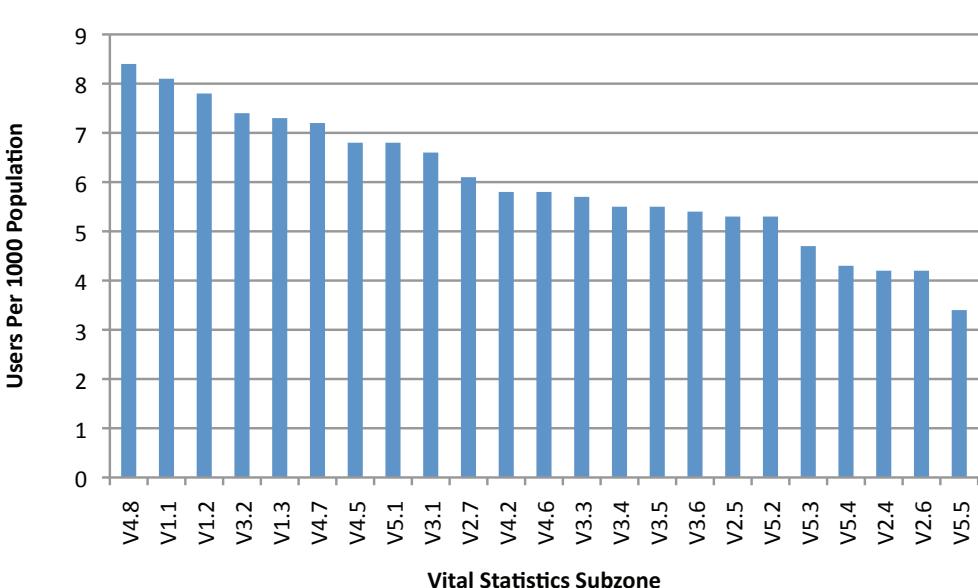

Age-specific utilization of oxycodone, 2001-2010.

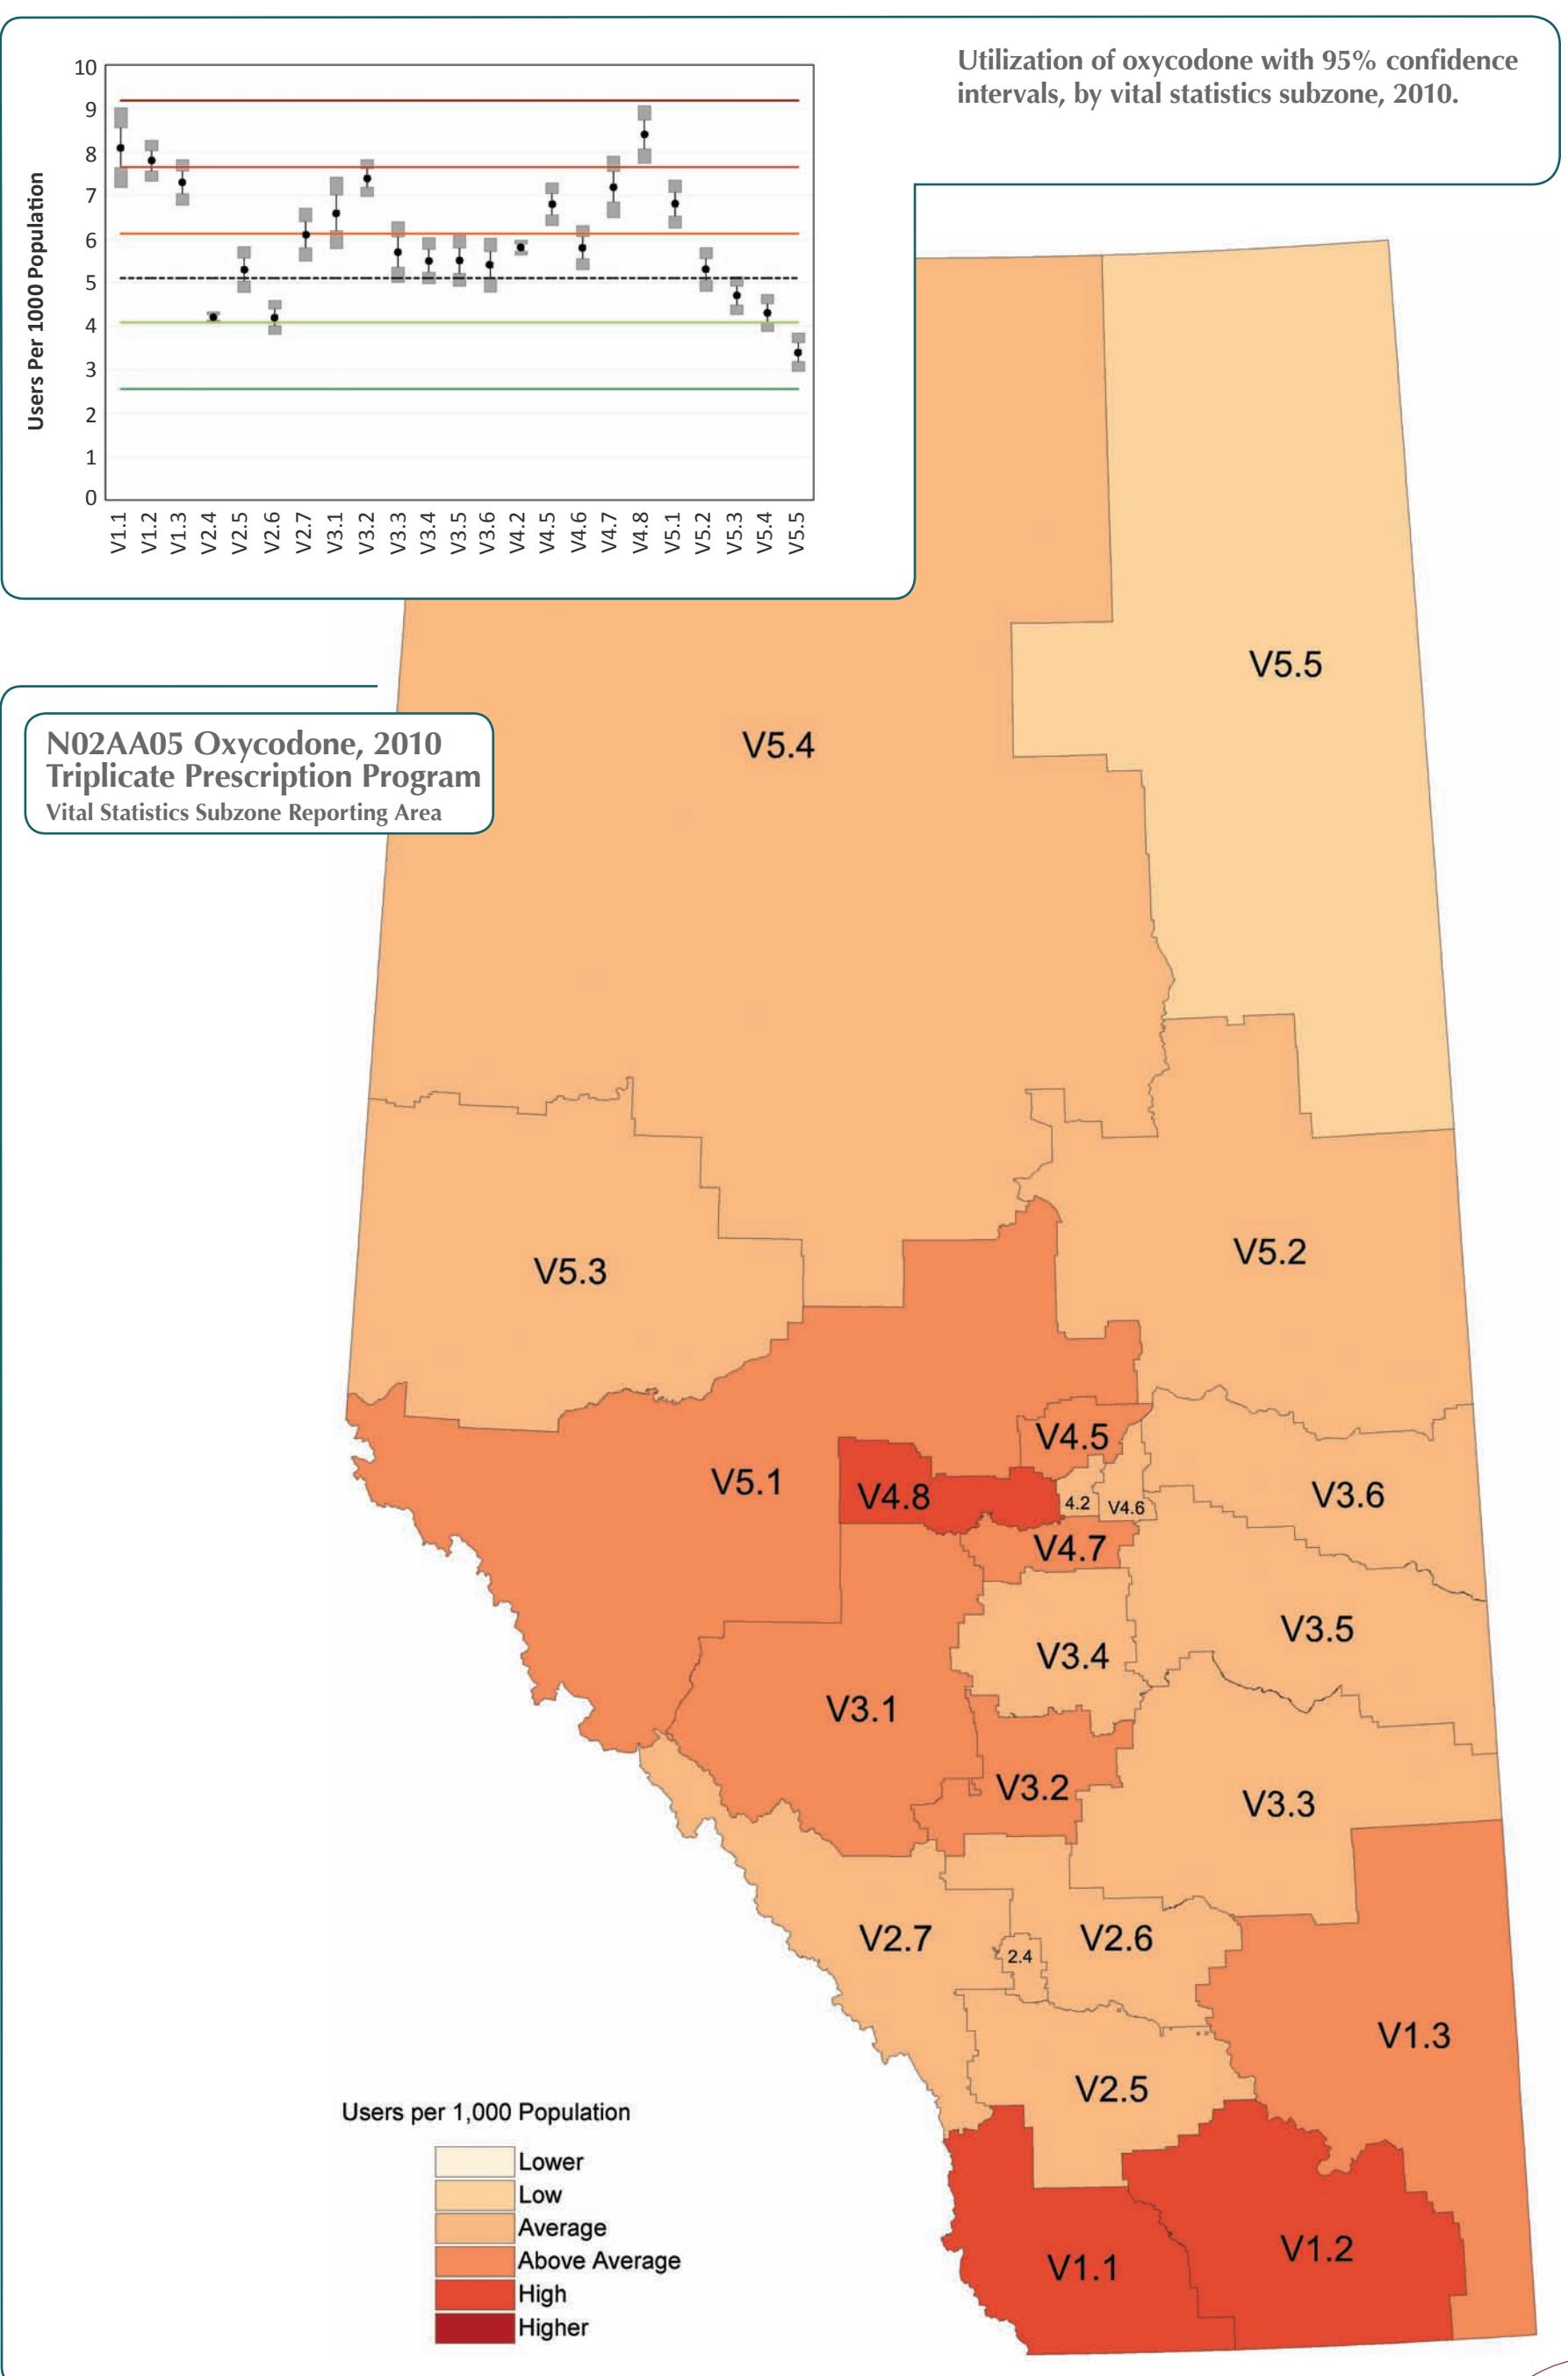

Distribution of vital statistics subzone utilization of oxycodone, 2001-2010.

Ranked vital statistics subzone utilization of oxycodone, 2010.

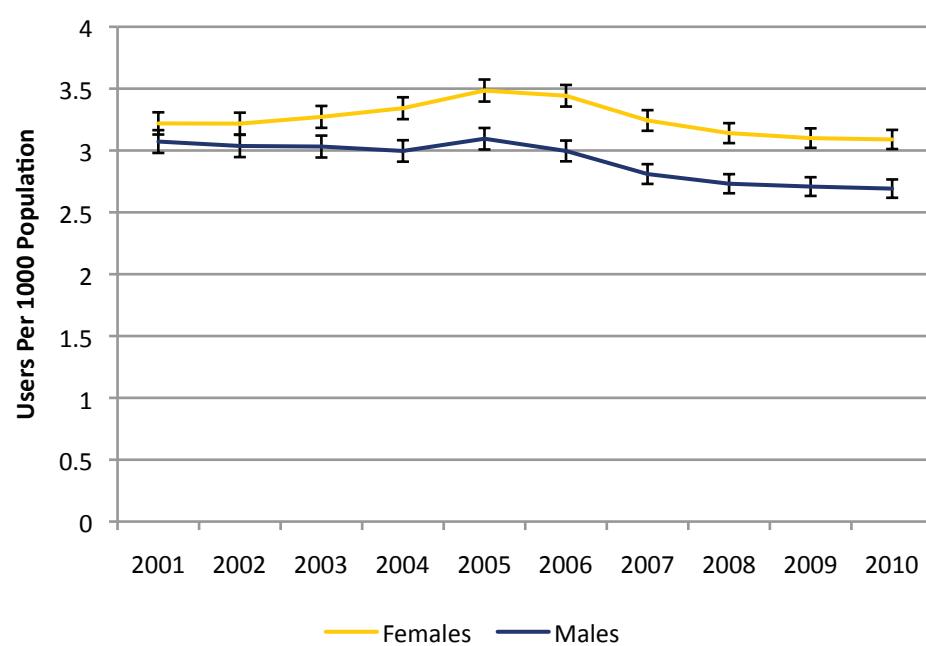

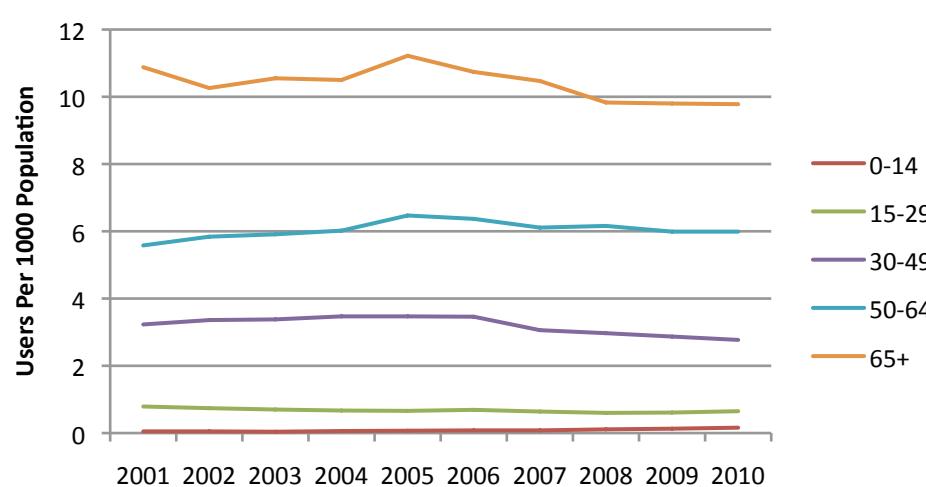

## Comparison of Top Six Opioid Analgesics

### Morphine (N02AA01)

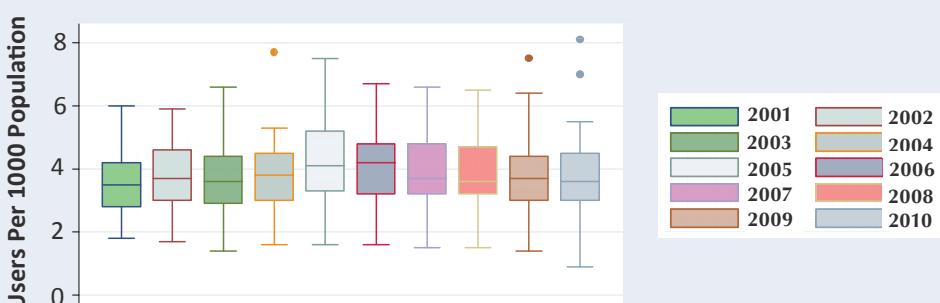

Age-standardized utilization of morphine, by sex, 2001-2010.

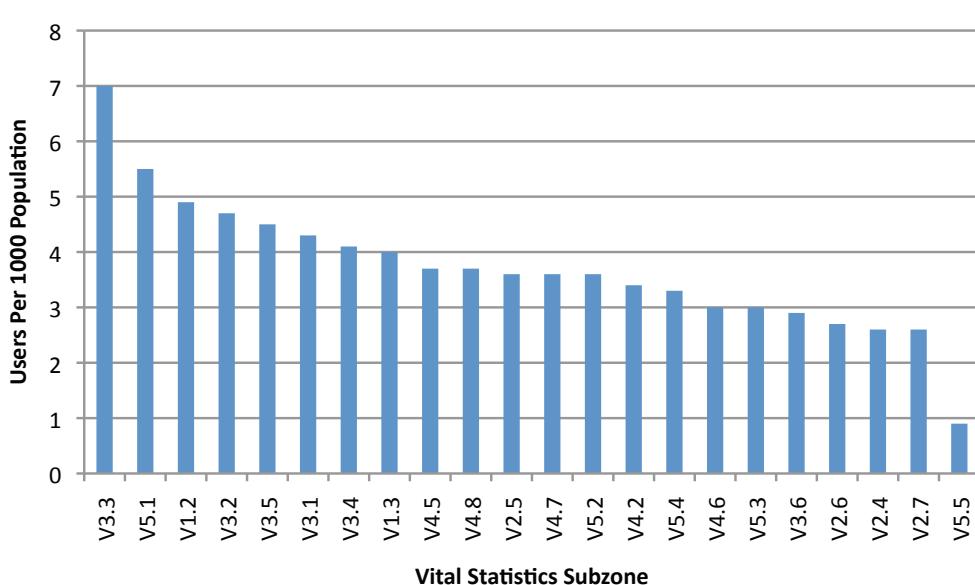

Age-specific utilization of morphine, 2001-2010.

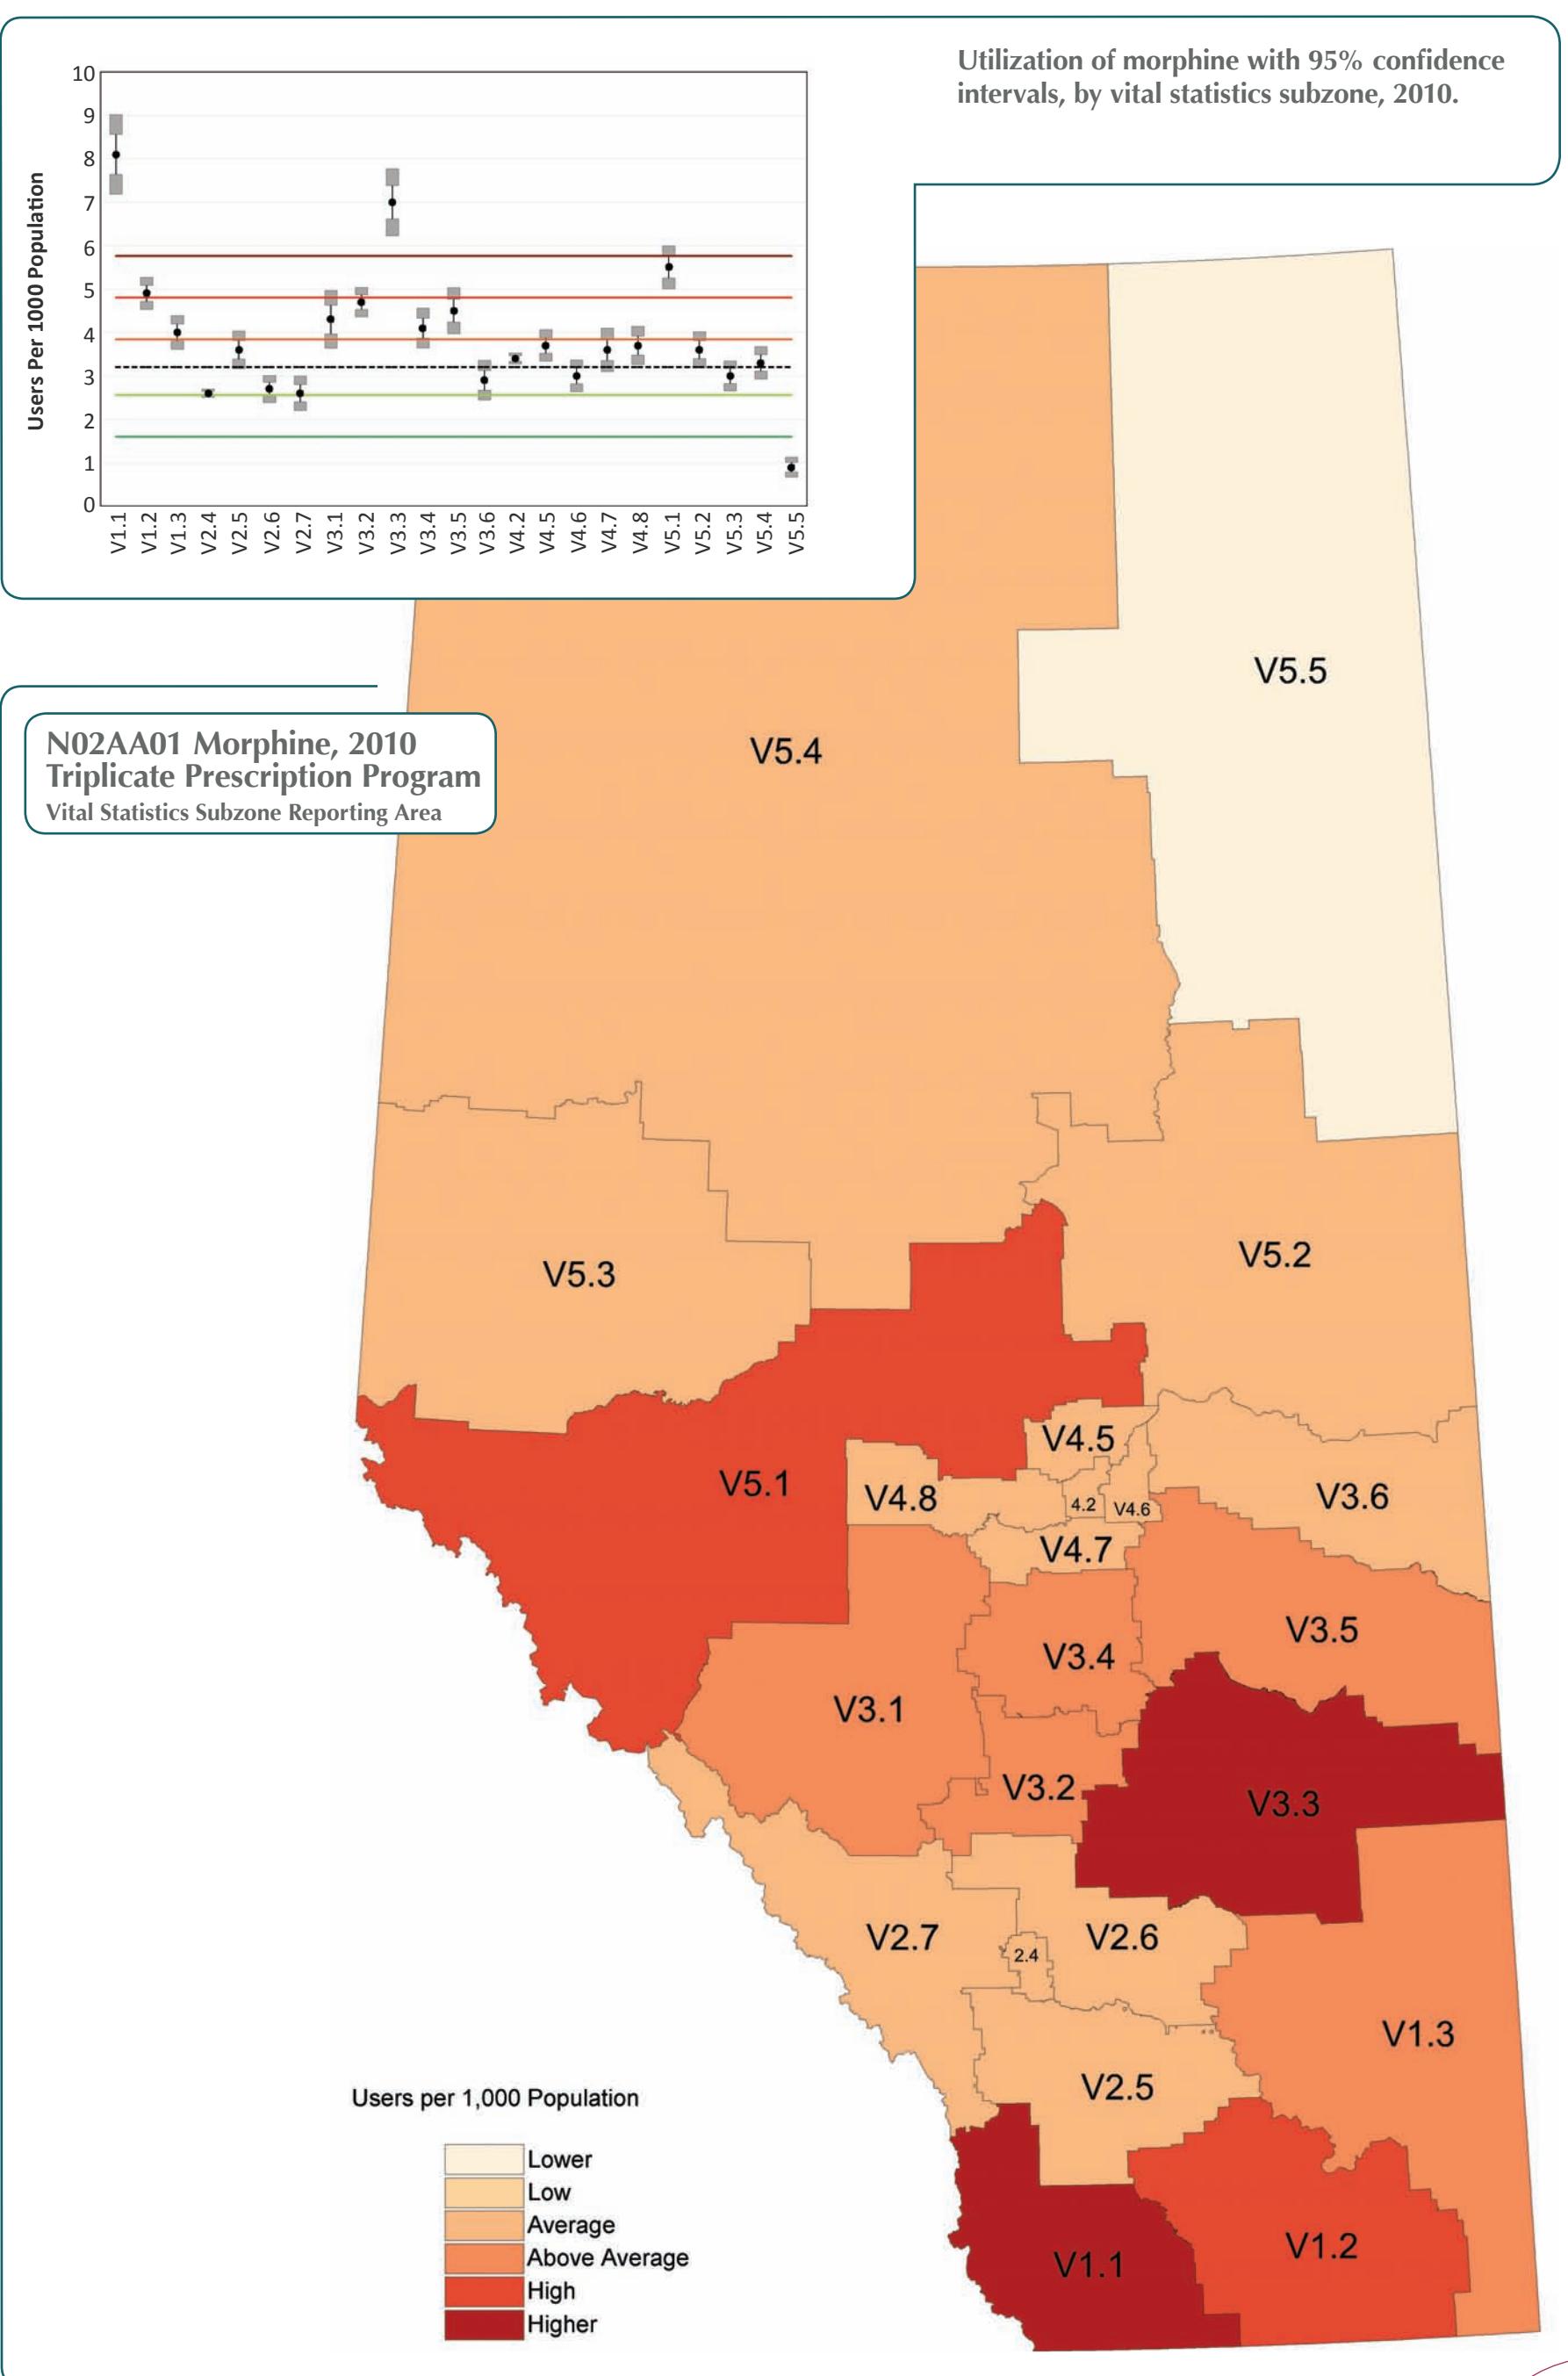

Distribution of vital statistics subzone utilization of morphine, 2001-2010.

Ranked vital statistics subzone utilization of morphine, 2010.

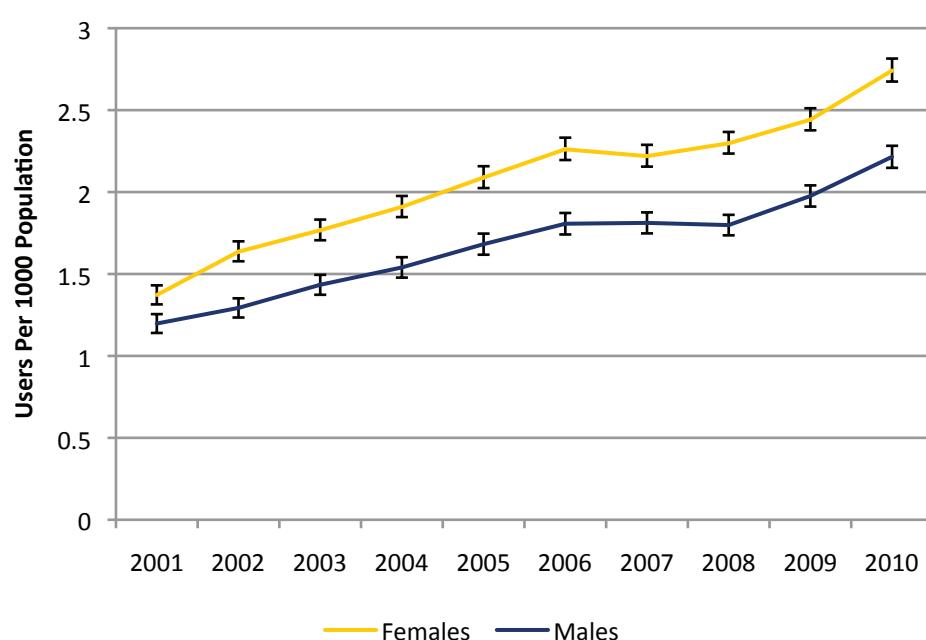

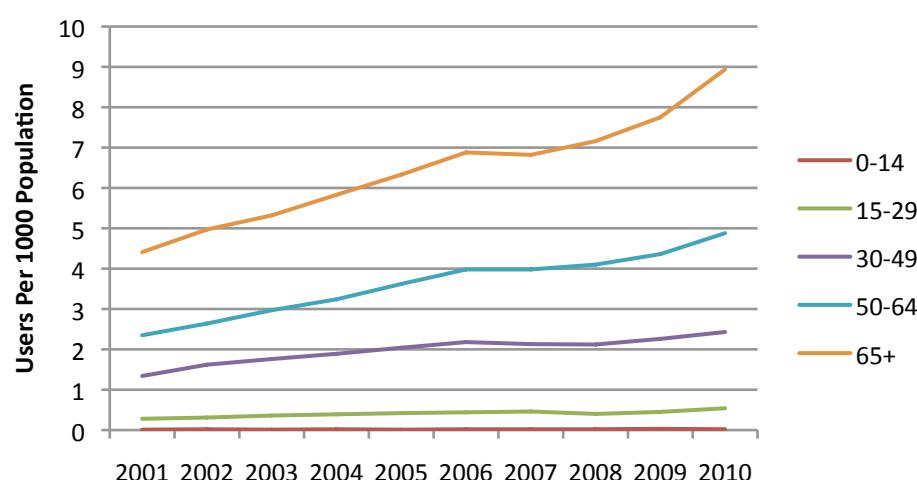

## Comparison of Top Six Opioid Analgesics

### Hydromorphone (N02AA03)

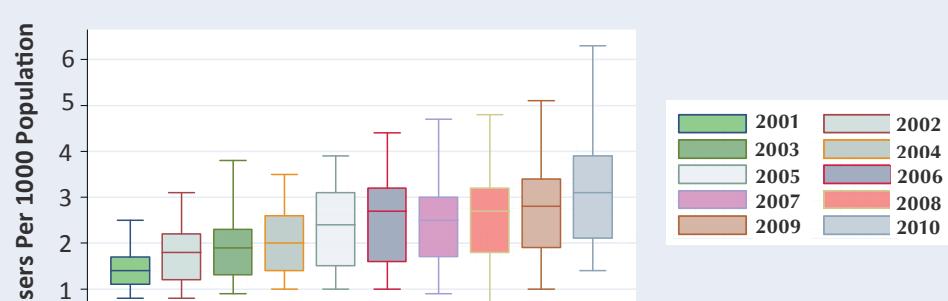

Age-standardized utilization of hydromorphone, by sex, 2001-2010.

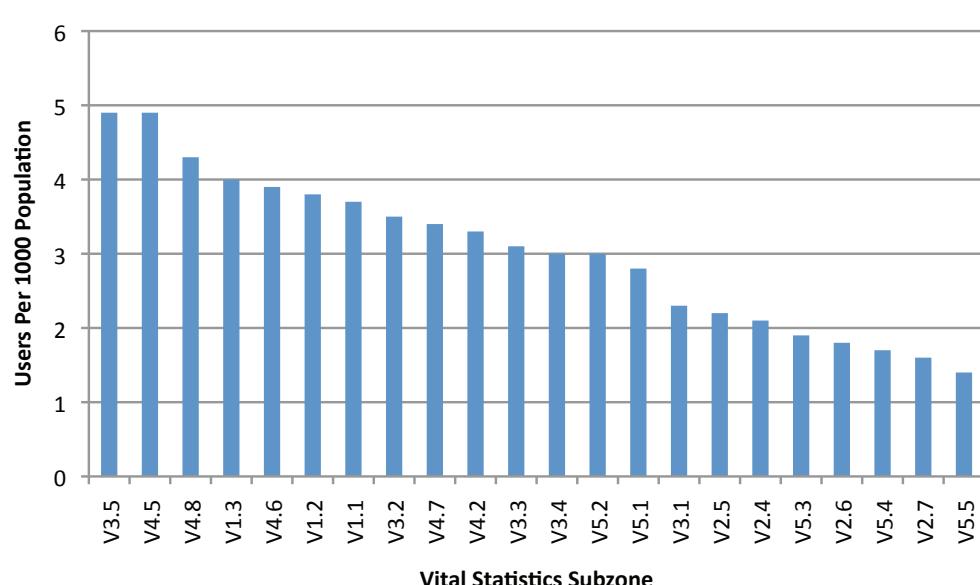

Age-specific utilization of hydromorphone, 2001-2010.

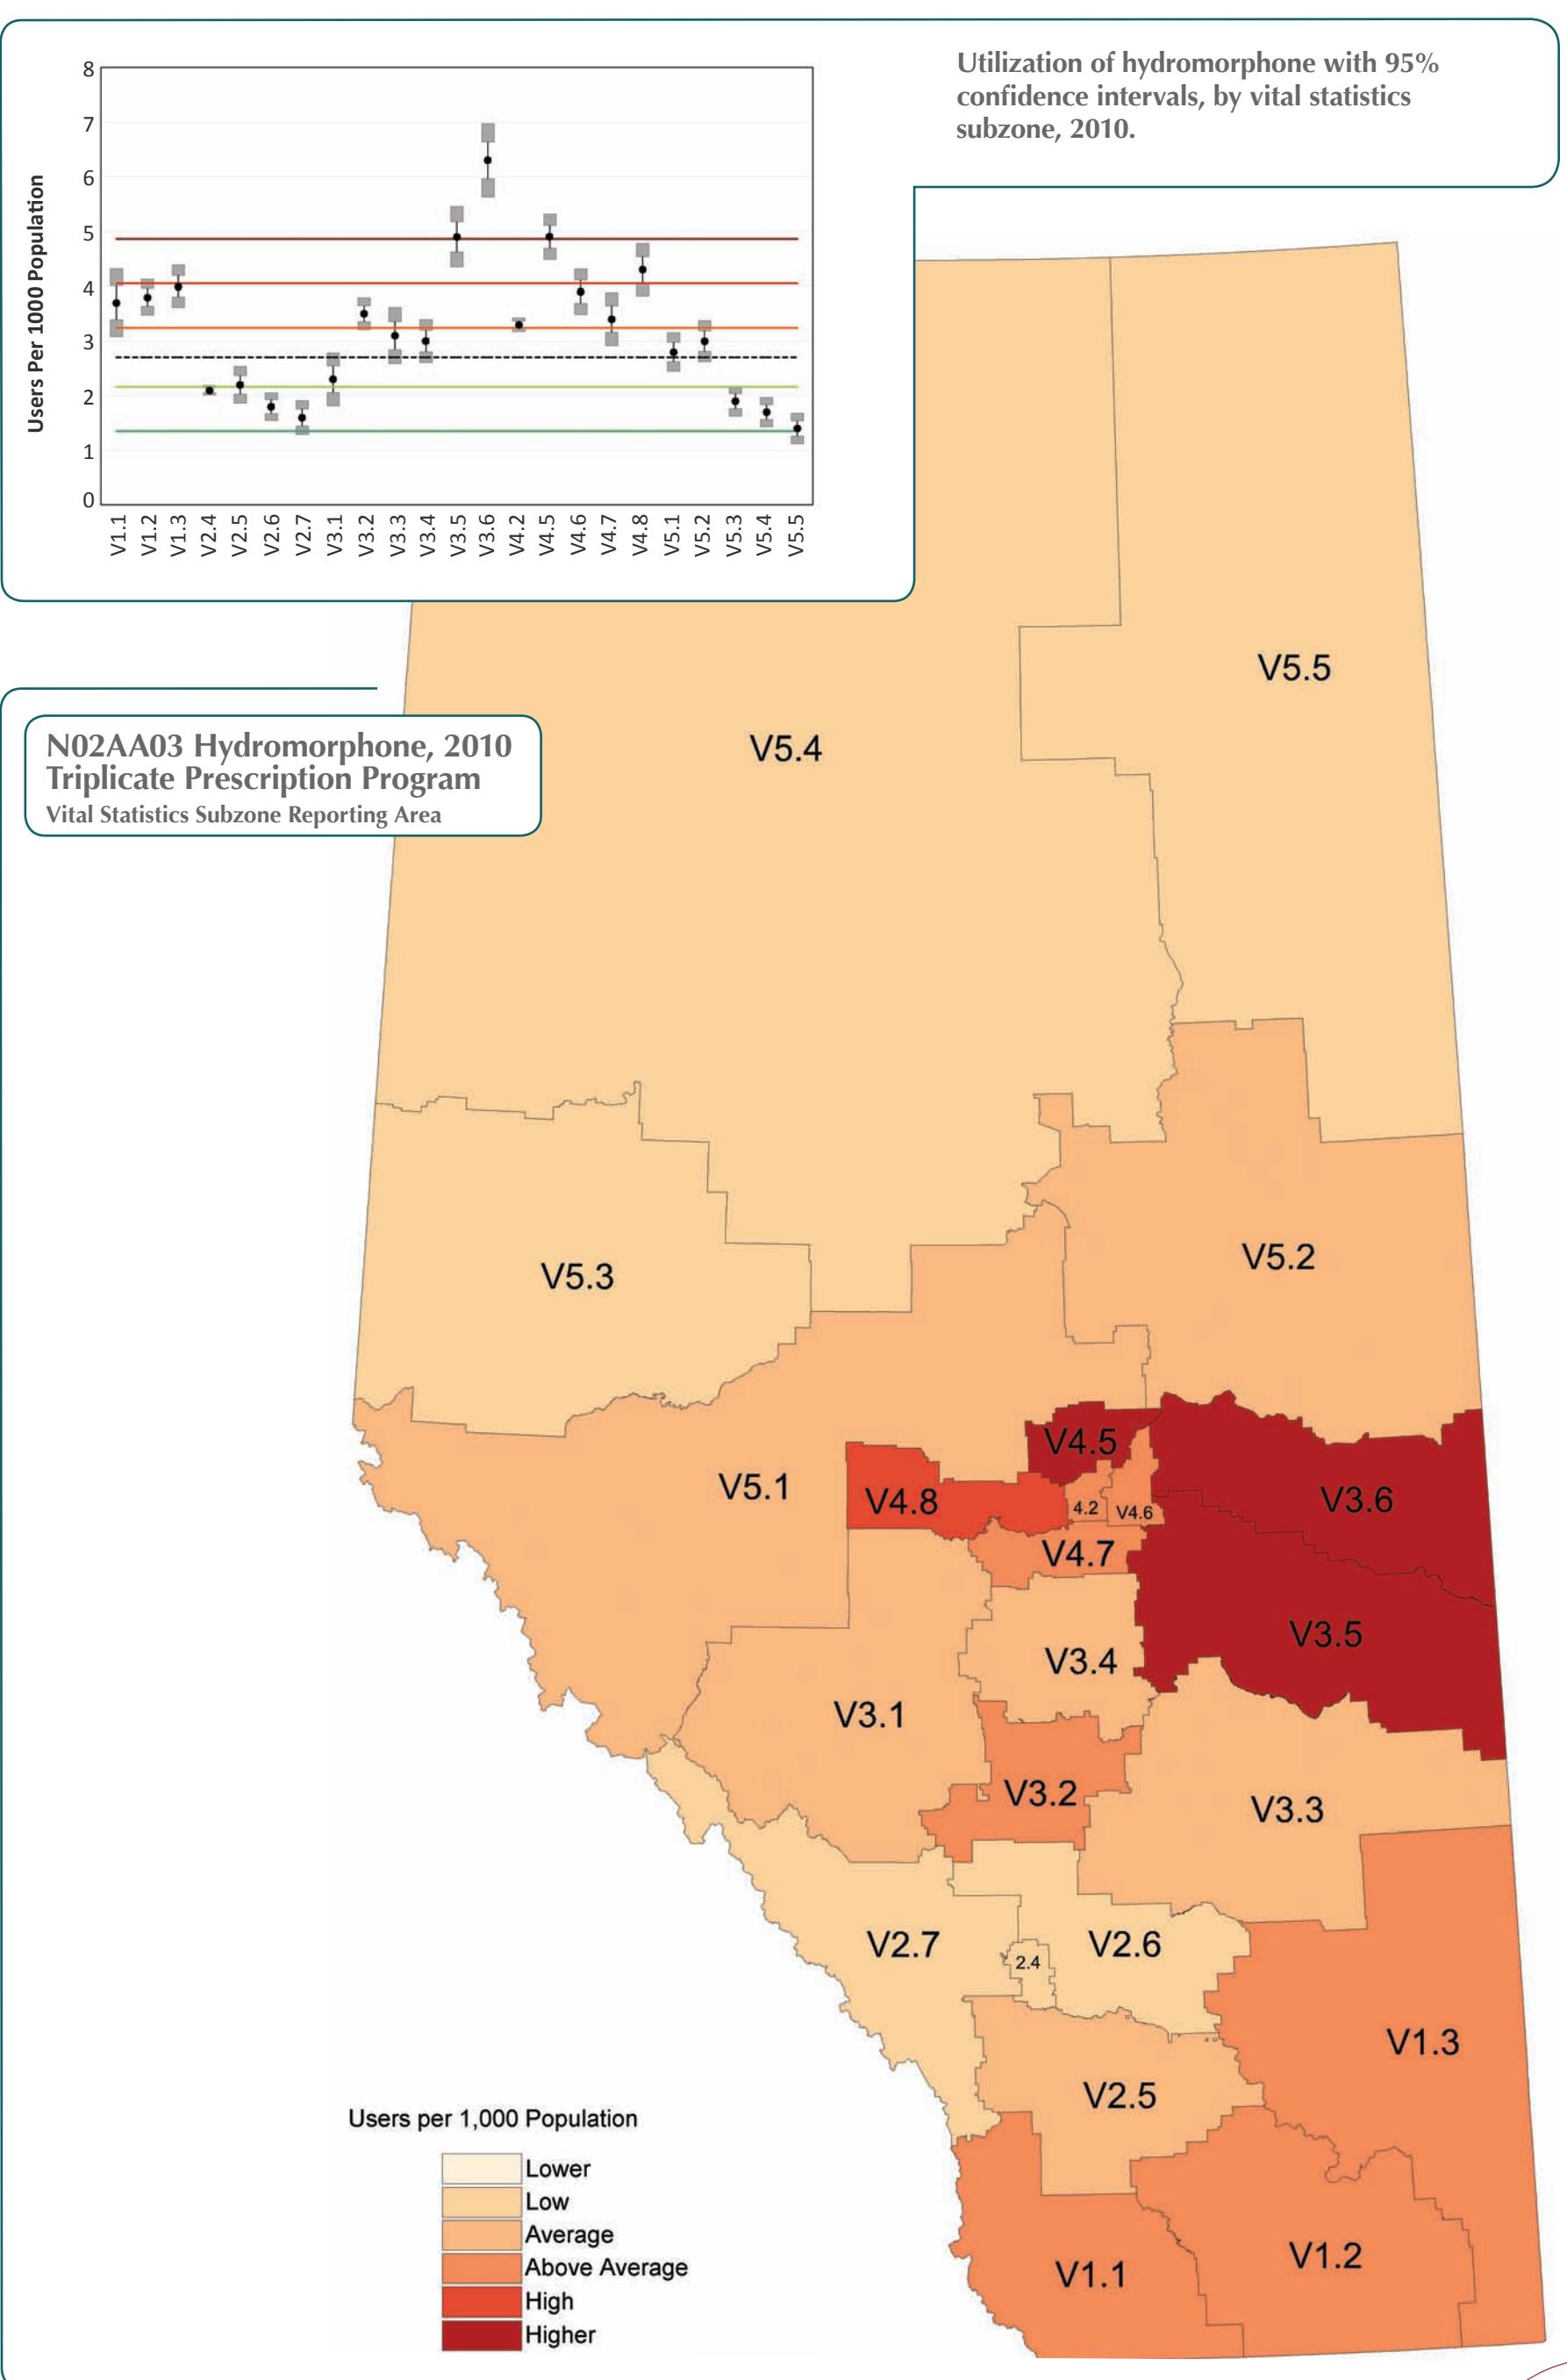

Distribution of vital statistics subzone utilization of hydromorphone, 2001-2010.

Ranked vital statistics subzone utilization of hydromorphone, 2010.

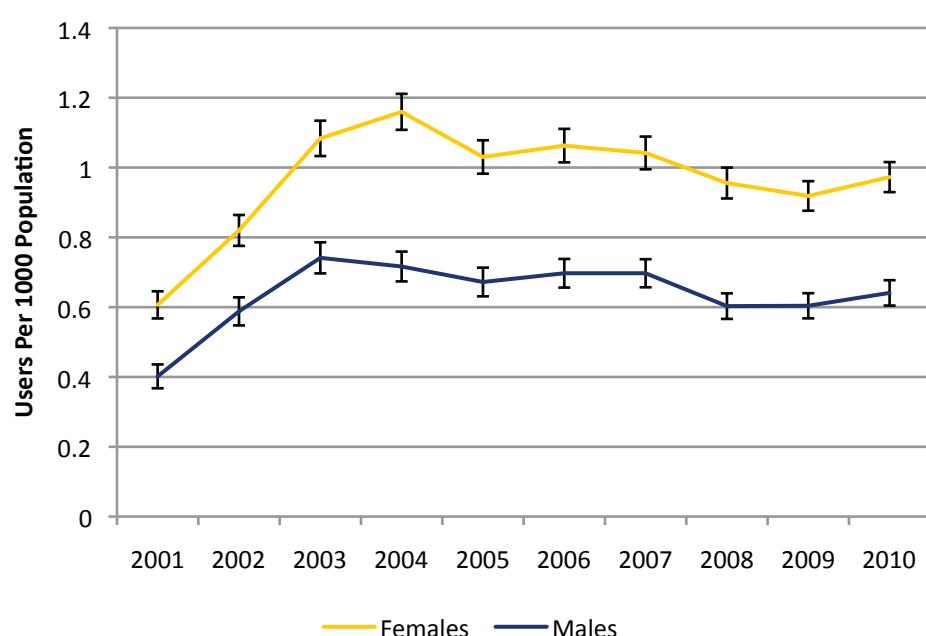

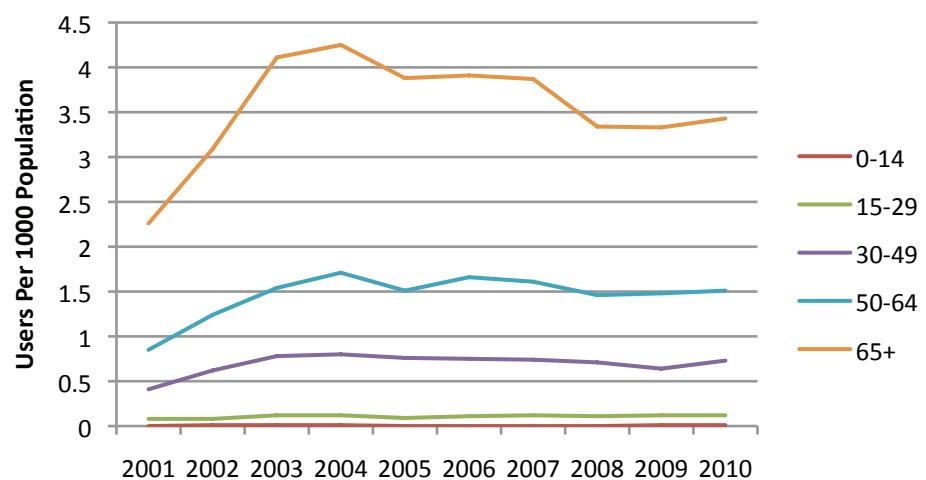

## Comparison of Top Six Opioid Analgesics

### Fentanyl (N02AB03)

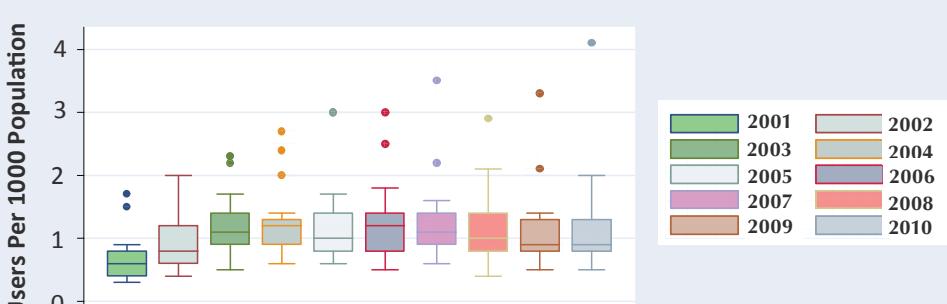

Age-standardized utilization of fentanyl, by sex, 2001-2010.

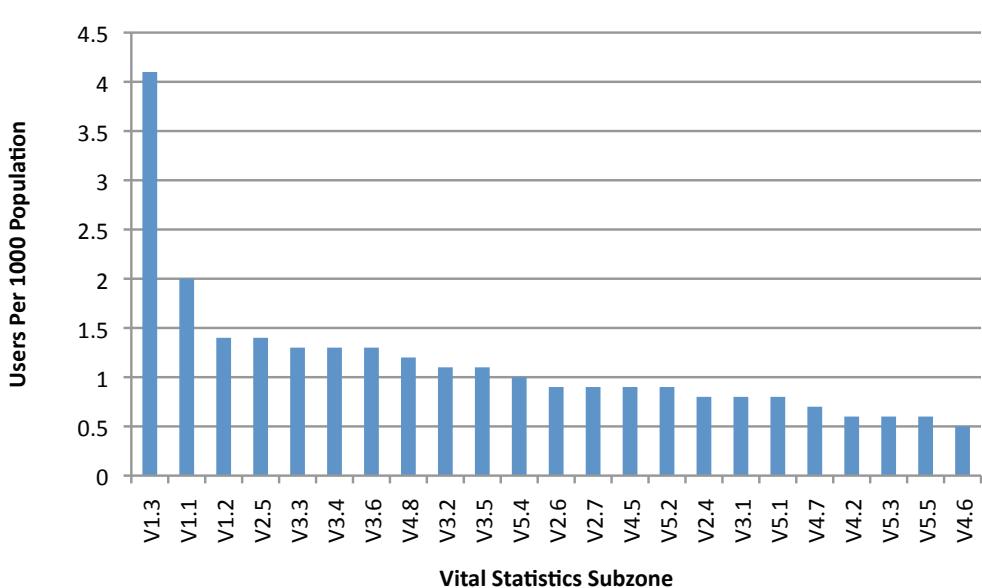

Age-specific utilization of fentanyl, 2001-2010.

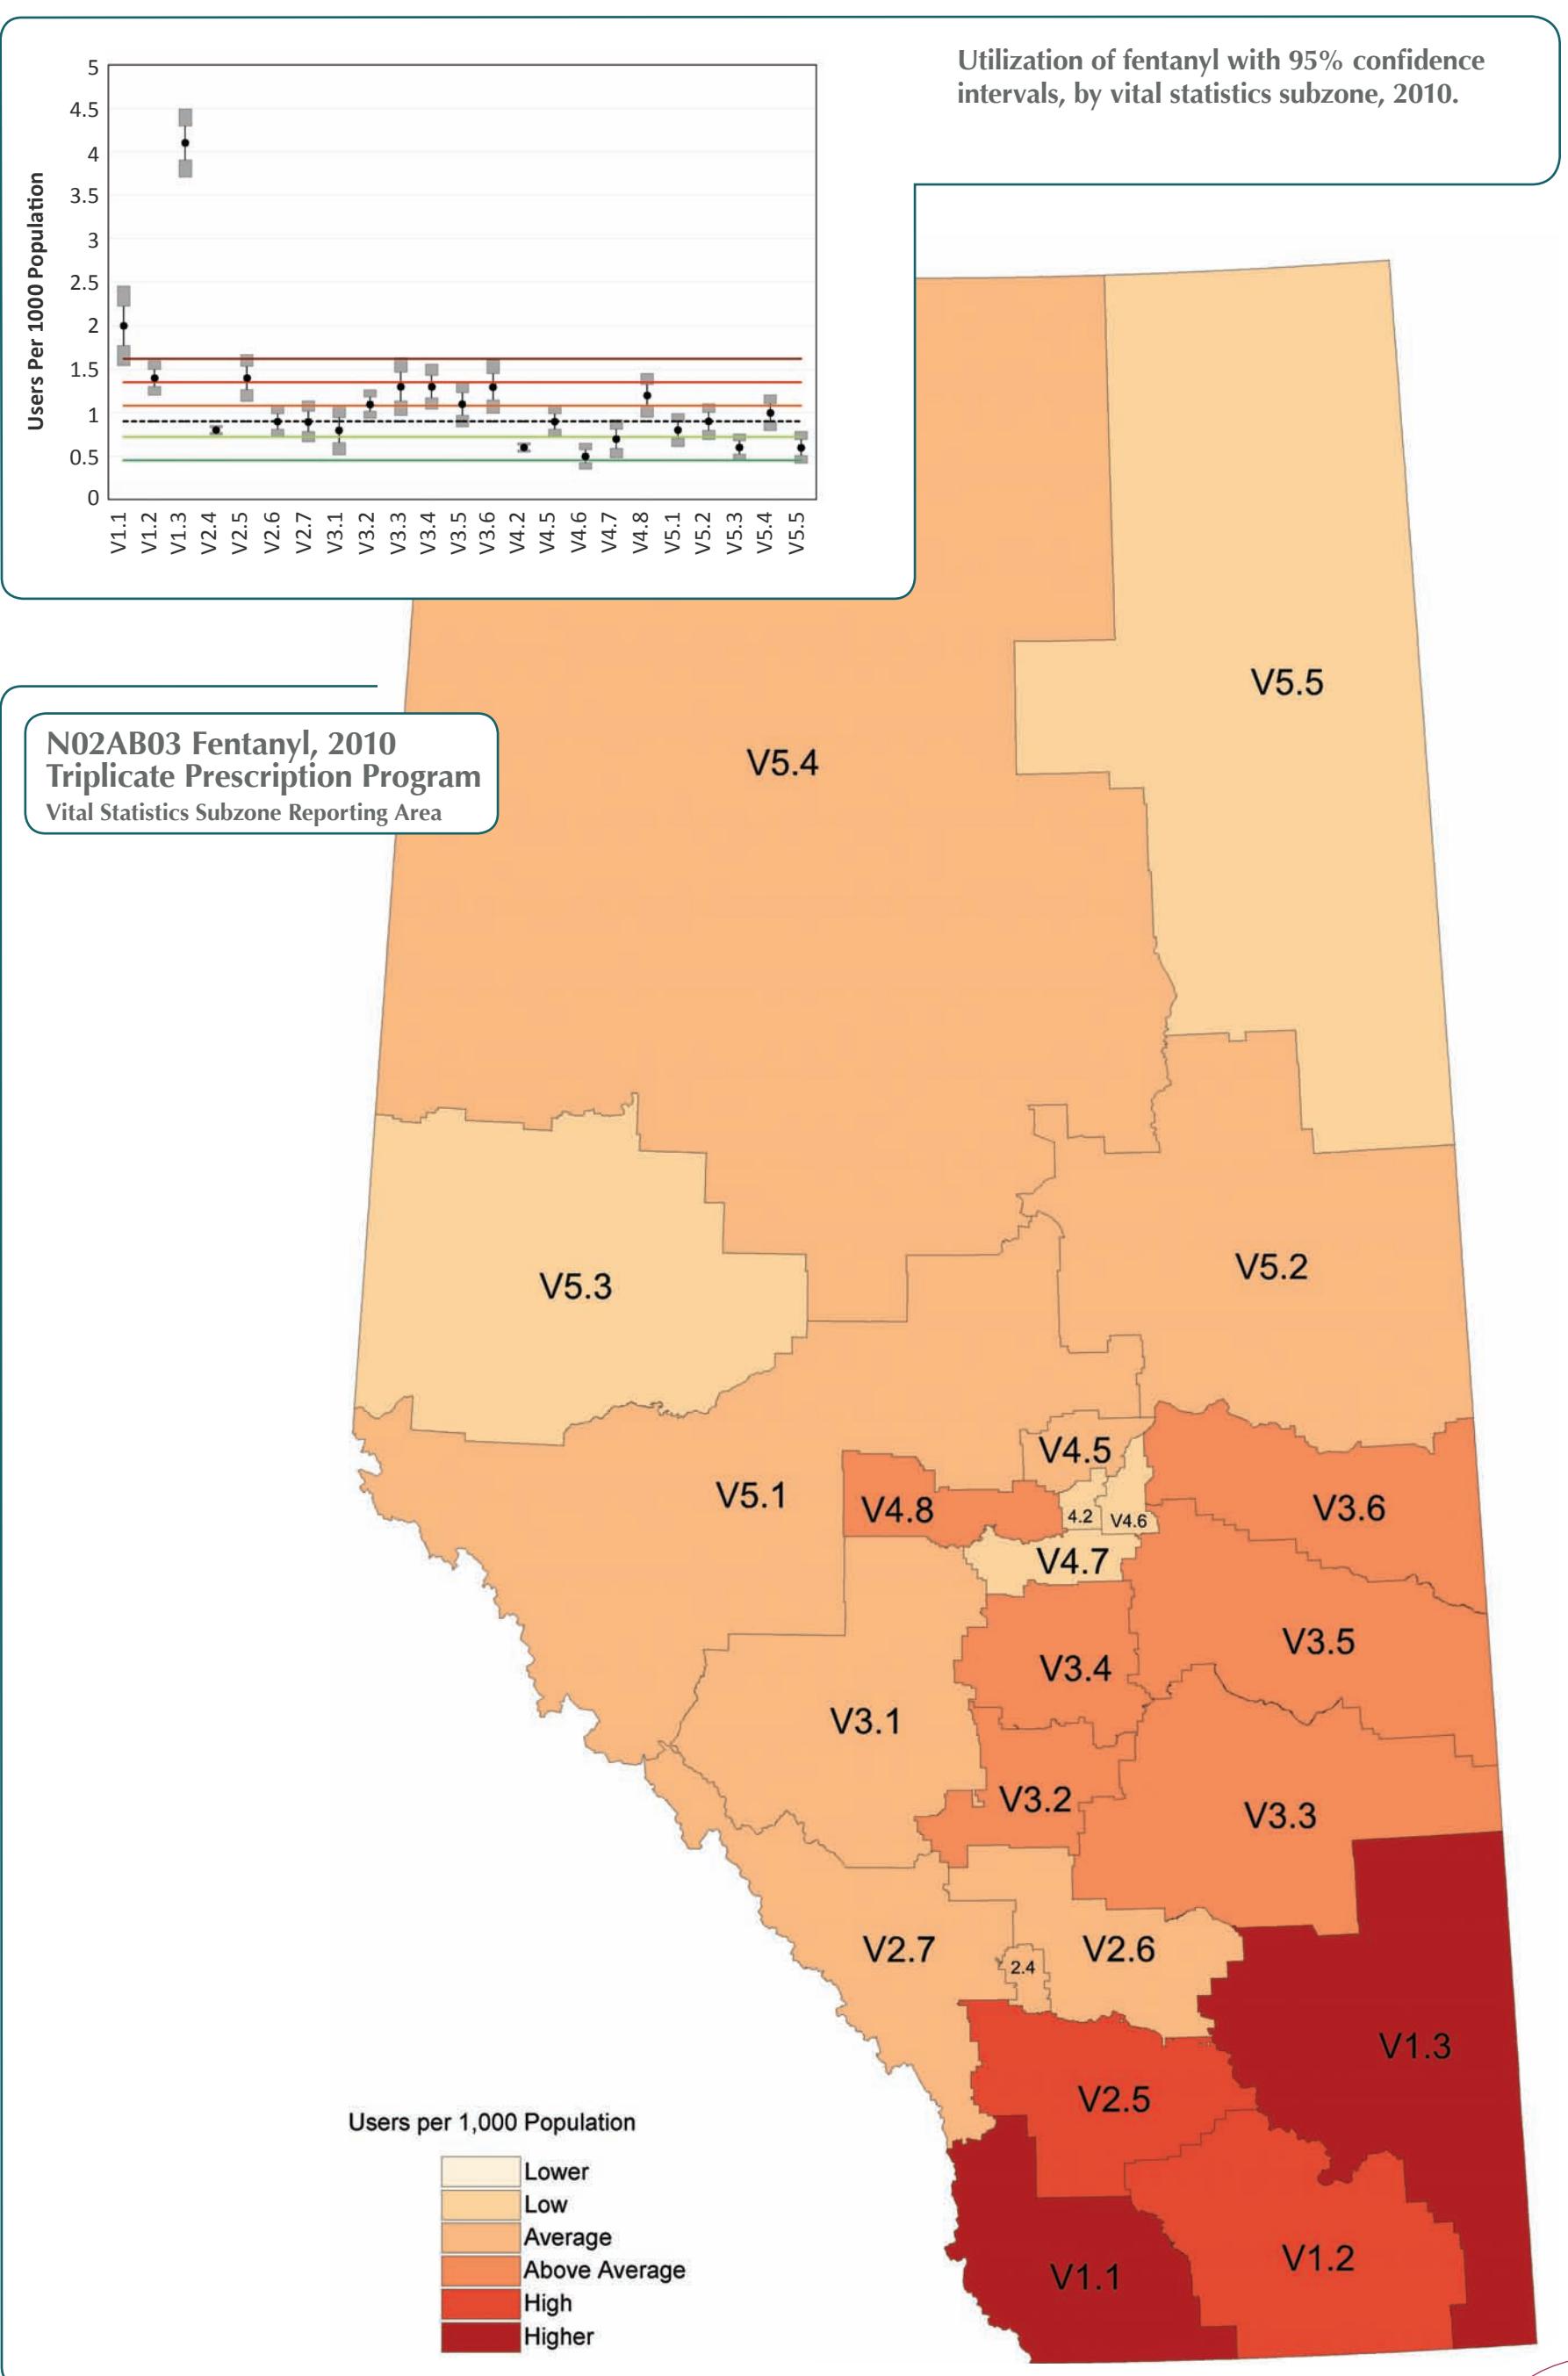

Distribution of vital statistics subzone utilization of fentanyl, 2001-2010.

Ranked vital statistics subzone utilization of fentanyl, 2010.

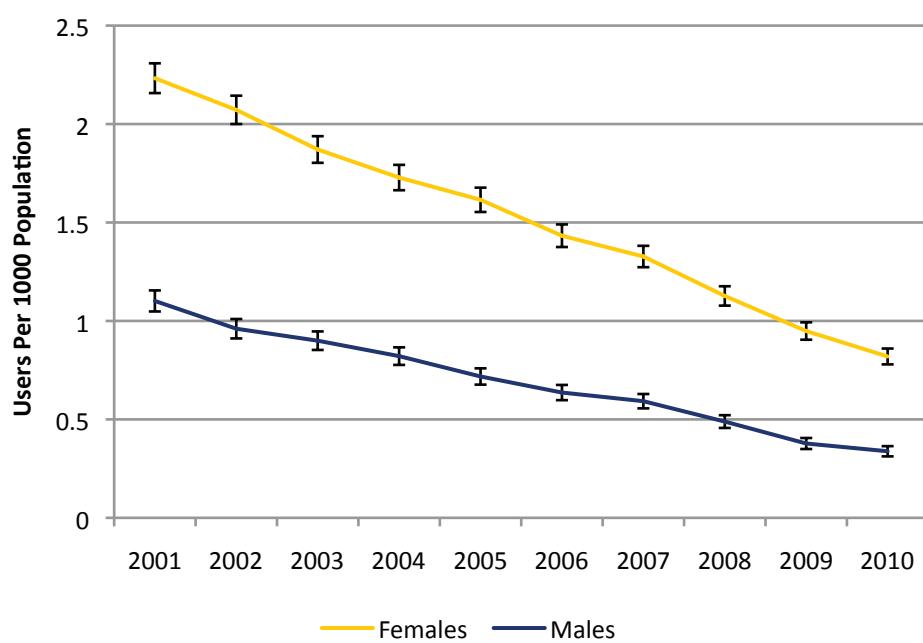

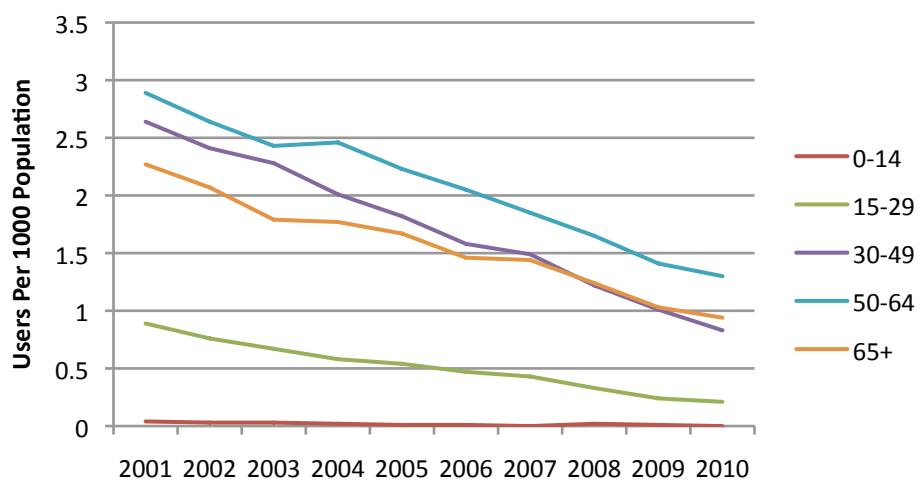

## Comparison of Top Six Opioid Analgesics

### Pethidine (N02AB02)

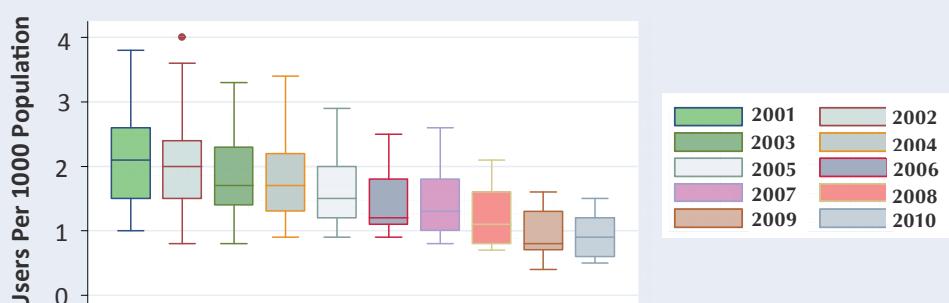

Age-standardized utilization of pethidine, by sex, 2001-2010.

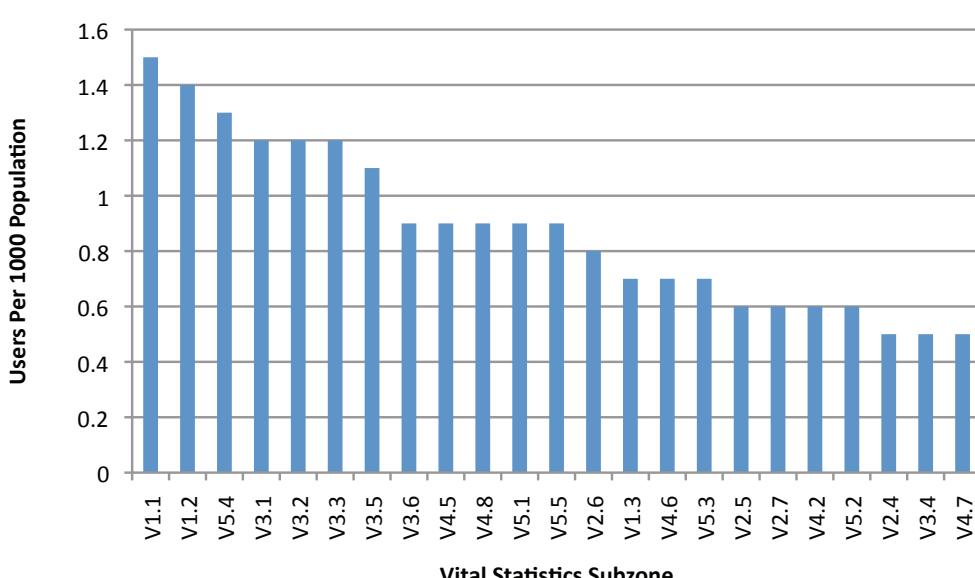

Age-specific utilization of pethidine, 2001-2010.

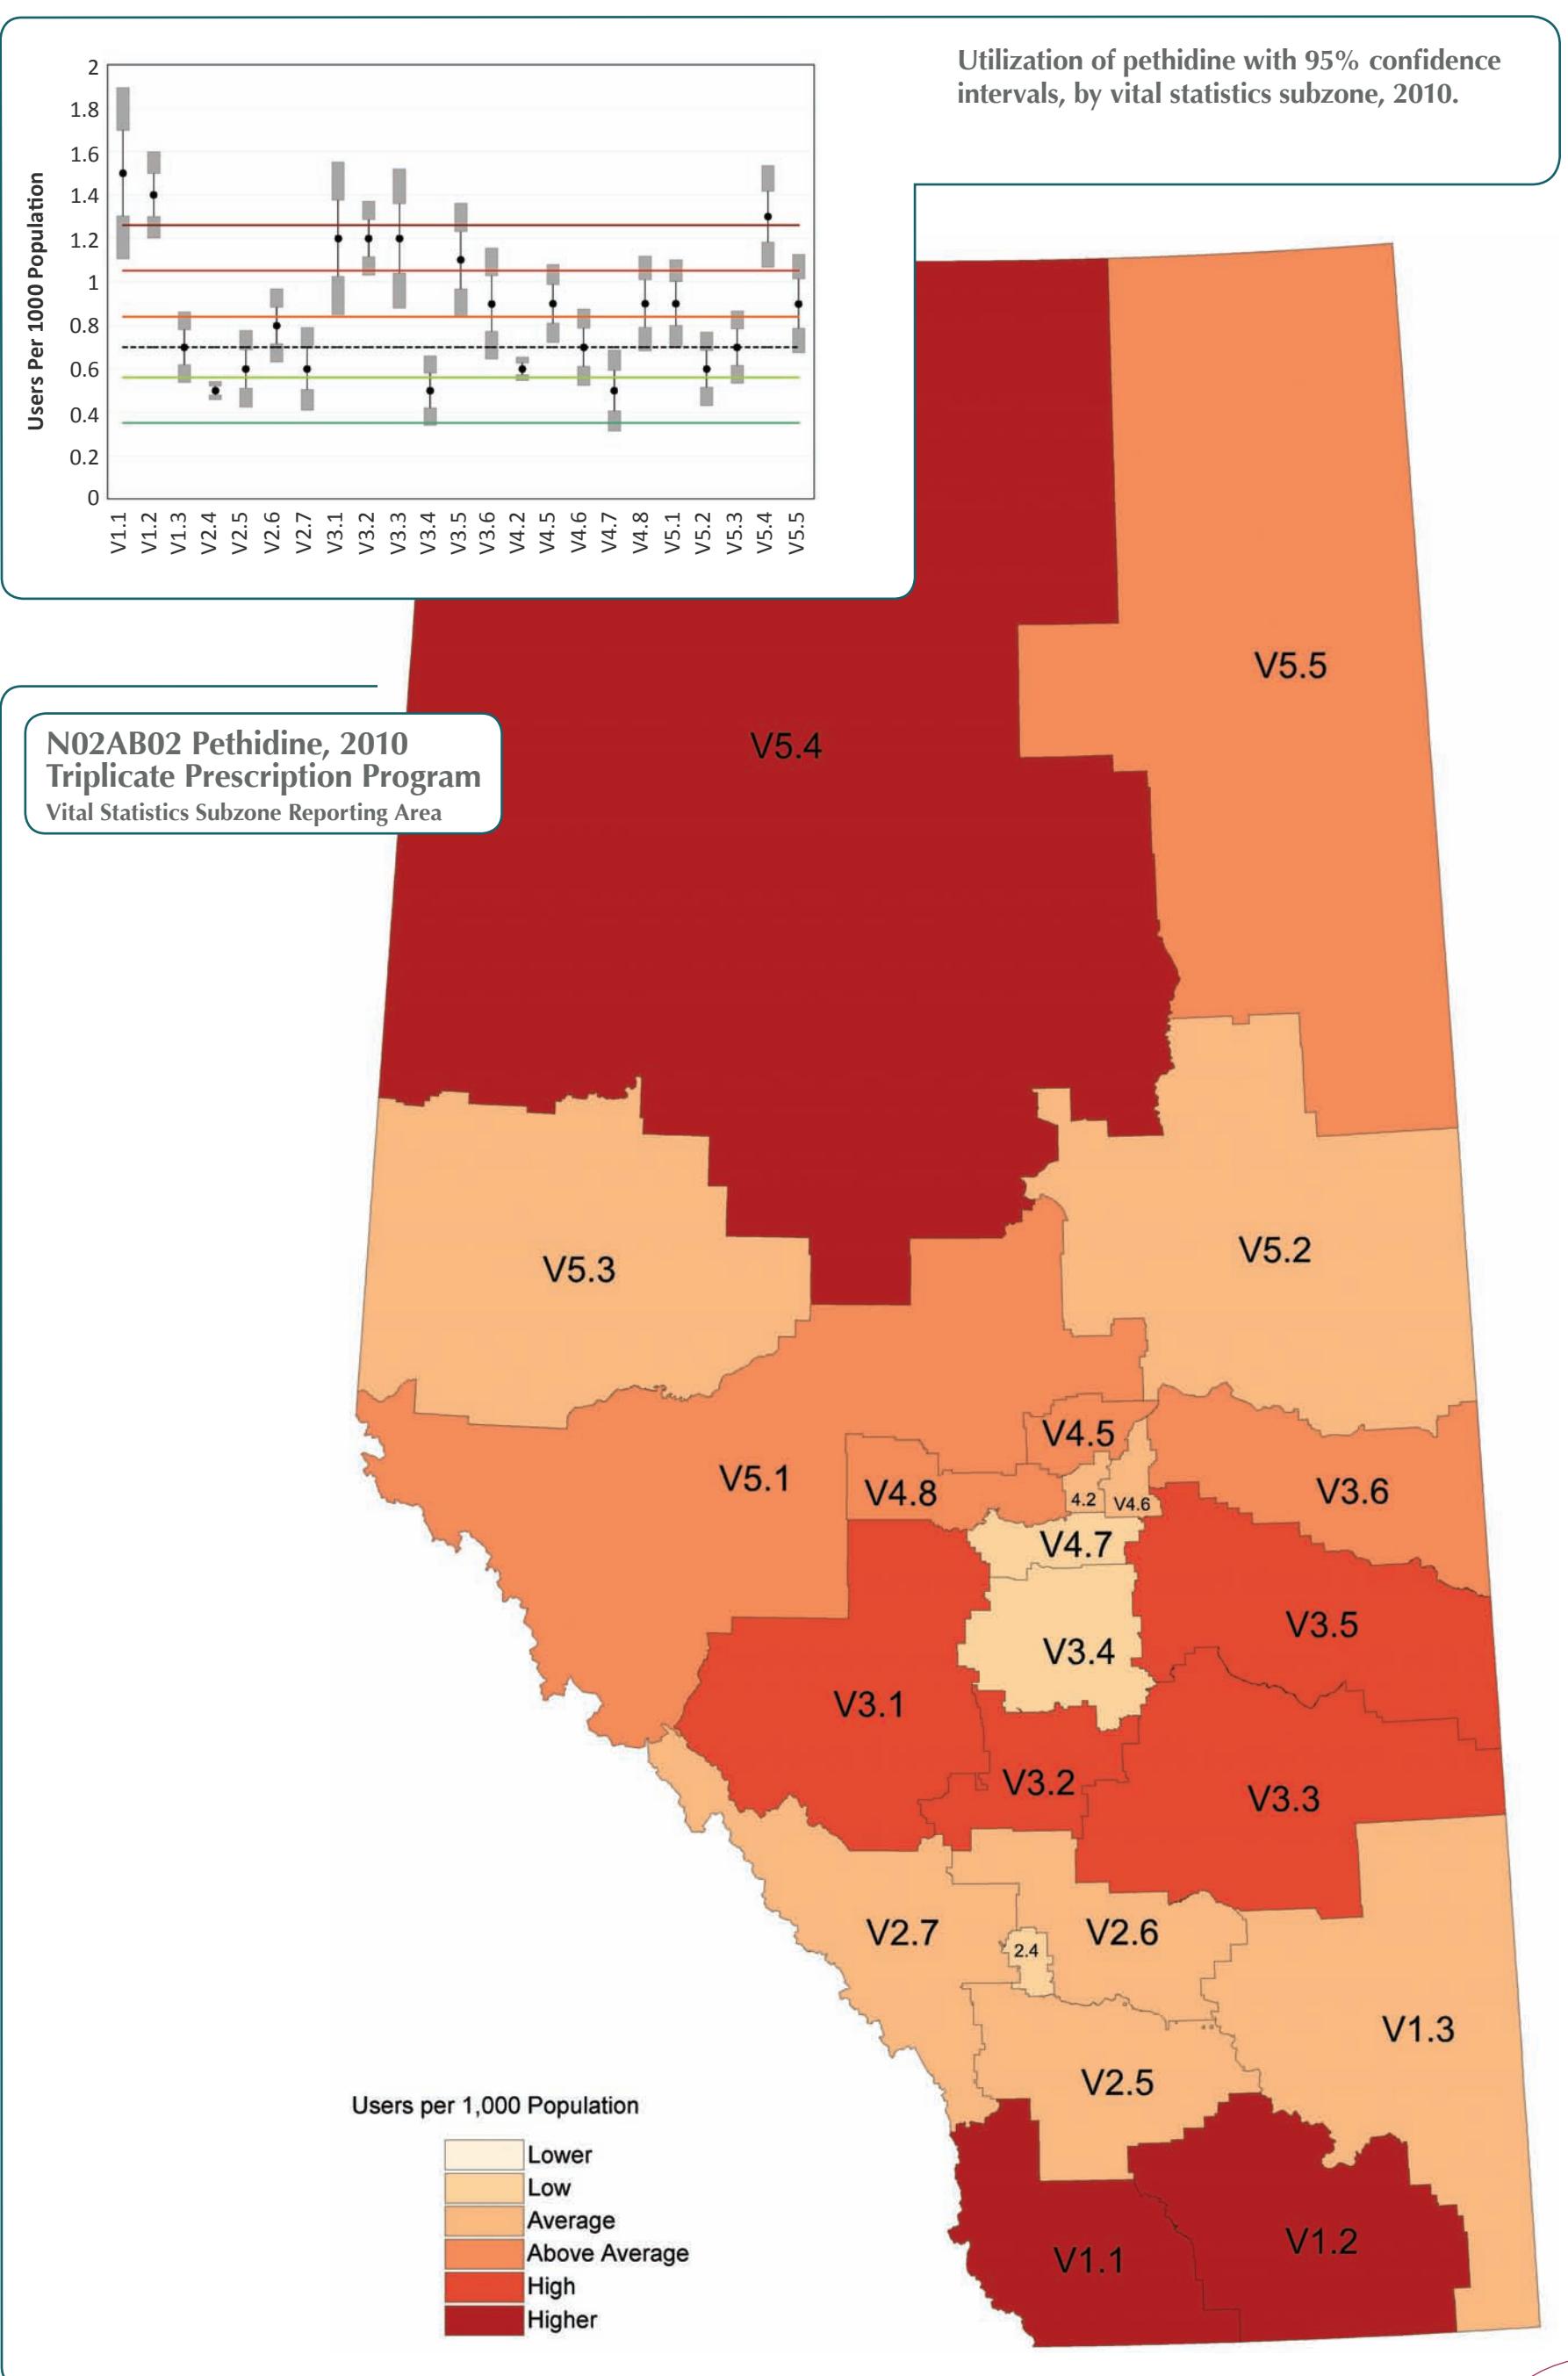

Distribution of vital statistics subzone utilization of pethidine, 2001-2010.

Ranked vital statistics subzone utilization of pethidine, 2010.
